

A dramatic volcanic eruption at night. A massive, dark plume of ash and smoke rises from a mountain, illuminated from within by bright orange and yellow fire. Several bright white lightning bolts strike the plume and the surrounding dark sky. The foreground shows the dark, silty slopes of the volcano. The sky is a deep, dark blue, with some faint stars visible. The overall scene is one of intense natural power and destruction.

About Antolini®

ANTOLINI®

HAUTE NATURE®

Antolini® is a world leader in the natural stone production and at the absolute forefront of the industry. The mission of the company - founded by Luigi Antolini in 1956 and active today on a global scale - is to offer a wide selection of materials standing out for their unique colours, finishes and patterns.

Antolini® produces and distributes natural stone, highlighting and enhancing its unique beauty thanks to the skillful combination of craftsmanship and technological innovation. Quarrying from the best sites around the world with passion and insight, the company constantly offers new and exclusive solutions, making them available to the most creative and professional minds and to the beauty lovers.

Every piece of stone produced by Antolini® celebrates Nature through its colours, opening itself up to interactions not only with the related worlds of interior design and furniture but also the more distant worlds of art and fashion. More than a thousand natural stones are available in the Antolini®'s products portfolio. The Exclusive Stone Collection represents its continuous commitment and dedication to offer unique and extraordinary natural stone materials to its customers.

THE ORIGINS OF BEAUTY:

THE CAREFUL SELECTION OF MATERIALS

Through the assessment and technical skills of carefully selected experts, the company chooses the best quarries in the world in order to offer a unique range of products. The expertise and experience of these professionals result in the identification of the most exclusive extraction sites as well as the best blocks, which are subsequently classified according to size, aesthetic and structural characteristics. The experience and intuition of the Antolini® family guarantee this careful selection, so that the extracted stones fully respect the criteria of excellence imposed by the company.

SUSTAINABLE TECHNOLOGY

FOR INNOVATIVE SOLUTIONS

Antolini® has always been at the forefront of research and innovation also in the stone processing technologies. In addition to the use of the latest state-of-the-art equipment to increase product quality standards while reducing environmental impact, the company has been able to design and patent brand new processes capable of granting exclusive and innovative solutions.

Foremost among these is **Azerocare®Plus**. This revolutionary process for natural stone patented by Antolini®, is designed to protect marble, onyx and soft quartzites surfaces in **Lux®**, **Matt** and **Lether** finish from staining and etching caused by contact with acidic organic substances. **Azerocare®Plus** is the ideal solution for surfaces in kitchen and bathroom spaces allowing stones to maintain their natural colours and characteristics unaltered.

To support a healthier and cleaner lifestyle in any indoor environment, Antolini® developed **Azerobact®plus**, the first and only treatment for all natural stone that prevents the growth of bacteria and mold. Suitable for all applications, whether residential, hospitality or corporate, this treatment is perfect in the two areas where the need for protection is highest: kitchens, as **Azerobact®plus** is also suitable for contact with food, and bathrooms.

EXCLUSIVE PARTNERSHIPS

DESIGNED TO CREATE BEAUTY

Each Antolini® solution has the potential to create the most courageous visions. A precious and versatile tool in the hands of creative minds, stone can be shaped and molded to give life to unique pieces of work, each one characterized by a different form of expressive and communicative energy. The perfect synergy between exclusivity and a wide variety of products is at the heart of significant partnerships with leading names with architectural and design communities such as Giulio Cappellini, Alessandro La Spada, Raffaello Galiotto, Claudio Silvestrin and Alessandro Isola.

EXCLUSIVE COLLECTION

Curiosity and passion lead Antolini® to explore the remotest places on Earth every day, searching for the most refined of Mother Nature's creations. The Antolini® Exclusive Collection is the result of this quest an exclusive collection offering extraordinary materials from the finest quarries all over the world.

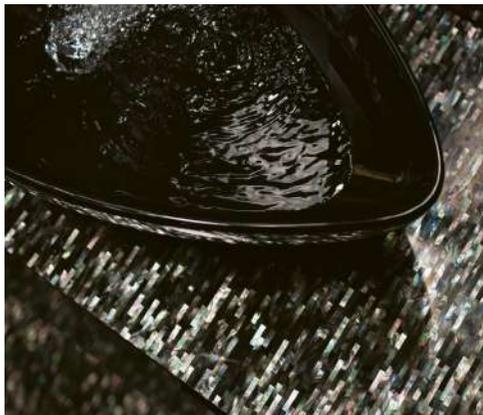

NATURAL STONE COLLECTION

Natural Stone is the collection that brings together the most varied natural stones: marble, granite, onyx, travertine and limestone for decorating with style and creating striking effects, thanks to the combination of emphatic character tones, harmonious shades and unique workmanship.

PRECIOUSTONE COLLECTION

For the Precioustone collection, the company has selected more than 120 varieties of precious gems turning them into first class coverings. Amethyst, quartz, jasper and agate create unrepeatable colour combinations making each room a real jewel.

SHELLSTONE COLLECTION

The Shellstone collection is a kaleidoscope of colours, reflections and iridescence evoking the enchanted atmosphere of the sea depths. Shellstone illuminates rooms with mother of pearl, one of Mother Nature's most beautiful and breathtaking creations, expertly transformed by skilled craftsmen into rainbow-coloured mosaic surfaces.

GEMSTONE COLLECTION

Precious gems meticulously matched and elegantly mounted on a marble base are at the heart of the astonishing and luxurious Gemstone collection. Each composition is unique giving a sense of harmony to the spaces through suggestive interplays of lights and colours.

TEXTURES+ COLLECTION

The Textures+ Collection features natural stone styled as if it were a fabric, causing the texture to stand out in a subtle interplay of tactile surfaces and sensations. With its delicate hues and harmonious hints of colour it will add a sense of elegance onto any room.

NATURA COLLECTION

The Natura Collection is the result of the desire to give life to elegant settings through exclusive processes applied to natural stones. The solidity of the stone is enhanced through textures embellished with sparkling embroidery, arabesques, minimal designs and geometric symphonies.

SLIM COLLECTION

The Antolini® Slim Collection is the result of the continuous search for new, sophisticated innovations for natural stone. The company's impressive technological investments have allowed for the development of new techniques for stone processing, allowing the cutting and processing of very thin slabs, with a thickness of about 11 mm + 1/-1 mm. Creativity and innovation have always been a fundamental part of the Antolini® family philosophy, and this collection fits right in.

ALLUMINATE COLLECTION

Alluminate reveals Antolini® natural stone in all its individual splendor. Thanks to a unique machining process that significantly reduces the thickness of the slab without altering its aesthetics or strength, the material can be backlit thereby offering architects, designers and artists an extremely striking yet sophisticated product.

PERCEPTION COLLECTION

Conceived by the designer Alessandro Isola, the Perception offers new perspectives to surfaces. The collection features individual pieces that create an optical effect thanks to which an apparently smooth monochromatic wall produces a relief motif from two natural masterpieces that amazes and fascinates everyone who looks at it.

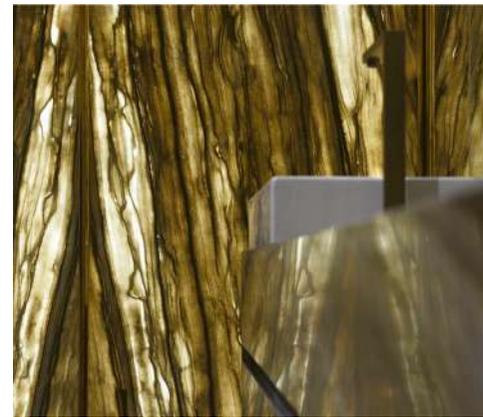

TWINLIGHT COLLECTION

Twinlight is the Antolini®'s collection that boosts Precioustone materials, enriching the space with uniqueness. The borders break up and dissolve as the result of the masterly bookmatched, and so the enchantment of the embrace happens; in the fusion of the parts, the whole raises above. Precious, smooth and vibrant, the Twinlight specularity is reflected with harmony and elegance in the forms of design.

WOODSTONE COLLECTION

The Woodstone Collection combines the solidity of natural stone with refined geometries that have always been considered the exclusive prerogative of wood floors. This collection creates numerous geometric effects, combining both sophistication and originality.

ALLIGHT COLLECTION

Antolini®'s Allight collection presents the company's materials enhanced to the absolute maximum. Thanks to a meticulous process that combines slabs of natural stone with a glass backing, the material becomes effectively translucent. As a result of this process, granite, quartzite and marble can be backlit, raising the beauty of any setting to new heights.

COUTURE COLLECTION

A collection made up of 12 designs created and packaged with a sartorial method in which Antolini®'s natural stone, combined with metal materials, marries geometric, natural and artistic decorations to unite and harmonize the world of high fashion with the universe of nature. Designed by Alessandro La Spada.

ESTROVERSO COLLECTION

Explore the essence of Estroverso: a collection of natural stone slabs, where each piece merges like verses of an ancient poem, composing an emotional puzzle. Each slab, andcrafted, is a unique masterpiece, a witness to timeless history and beauty.

ANTOLINI BLOCKS COLLECTION

Over the years, Antolini® has grown to include several new quarries. Holding exclusive rights on the best materials and quarries around the world, the company also deals and trades in natural stone blocks, offering the possibility of choosing from the most special and exclusive masterpieces by Mother Nature in its earliest form.

ANTOLINI | QUARTZ COLLECTION

Ideal for any lifestyle, Antolini | Quartz® surfaces represents the right balance between style and durability, offering exclusive patterns and solutions for a wide range of applications. The practicality of quartz surfaces compliments the design of any home the only way Antolini® can.

ANTOLINI | TECH COLLECTION

Through the process of pressing clay, sand and other natural materials at high temperatures, we create a durable and versatile product called Antolini | Tech®. This collection of porcelain slabs recreates the intricately beautiful patterns, designs, and veining of natural stones.

LADY A COLLECTION

Lady A's unique, handcrafted designs perfectly embrace a stunning variety of Antolini® Precioustones. Each element elegantly enhances the other to create the perfect harmony between Mother Nature's art and Lady A's concept of style. A true culmination of natural beauty in contemporary form.

MILAN, ITALY

Antolini's new one of a kind showroom provides a once in a lifetime opportunity to see over 1,300 of Antolini's natural works - marbles, crystals, quartzites and precioustone wrapped in plays of light and shadow, reflections and colors which come together to create a multisensory experience. The spectacular styling of the location incorporates various areas of the décor sector: residences, offices, hospitality and retail. Through the use of infinite varieties of natural stone interpreted in wall facings, surfaces and floors, islands, furnishing complements, as well as items like shelving, desks and tables - the hub becomes a lab to stimulate an idea of luxurious interior design, both contemporary and ancient at the same time. The facility offers personalized services for clients, thanks to 360° consulting that starts with the technical characteristics of the stone, and extends to its aesthetic qualities - offering the possible applications in interior design projects.

Antolini® Stoneroom® is the first worldwide design lab entirely focused on the universe of natural stone, exclusively signed by Antolini®

Set in the historic center of Milano City between Piazza Fontana and Via San Clemente, the Antolini® Stoneroom®, designed by Alessandro La Spada, offers 600m² of inspiration and personalized services to architects and interior designers to discover the infinite charm of natural stone.

Choose from a wide selection of 1300 natural materials, and thousands of samples available to customers - all in exclusive formats.
