

Dimas Solar is one of the largest manufacturers of **solar thermal systems** worldwide, operating for the past 44 years.

DIMAS rank as **No2 in Europe** and No7 worldwide, in the Solar Thermal Industry Manufacturing.

Its products have been recognized as of leading quality and efficiency by top SWH manufacturers, **sold in over 60 countries worldwide**.

FACTS AND FIGURES:

528.000 m² - annual production capacity of solar collectors and absorbers

92.000 m² - total plant area

97% OTIF - [on time in full delivery]

4.900.000 tons - total savings in carbon dioxide for the period 2010-2022

278.000 kW - average energy savings per year

DIMAS Certifications

DIMAS collaborates with the best certification and testing laboratories in the world, giving customers all the elements needed for a long successful partnership.

Pioneers in design, we develop methodologies in order to continuously improve the quality and efficiency of our organization and products, we aim for organized development, certified according to international industrial Standards, such as ISO9001, SOLAR KEYMARK, SRCC, SASO, DCL, in order to offer economic solutions with huge advantages for the people and environment.

We invest in partnerships with corporate and academic organizations, in order to participate in solar technologies and future markets for healthy growth.
