Size: 3600 m²

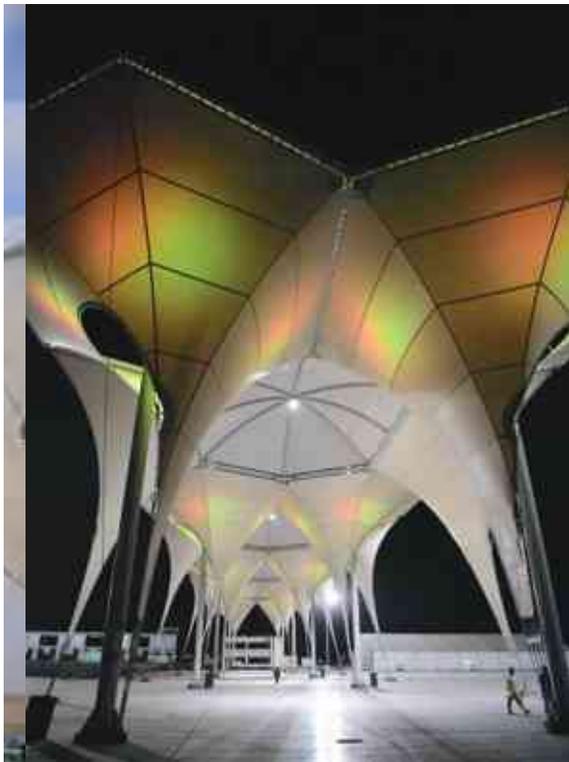

Location: Saudi Arabia - Onaiza

Fabric Type : PTFE

Multi purpose halls & customized structures

The concept behind tensioned membrane structures isn't new. Humans have been using forms of tensioned fabric to create tent structures for centuries, but only in the past few decades have we begun to adapt those principles to create technologically advanced and permanent variations.

Urban Entrances & Gates & Safari Camping Tents

A frequently asked question is whether tensile fabric structures are suitable for windy sites. The answer is yes as long as the canopy is properly engineered. In the computer analysis of the different load cases, wind uplift is usually as great as the live snow load. The detailing of the fittings and surrounding structure needs to take into account the maximum deflections of the membrane, as well as the loads.

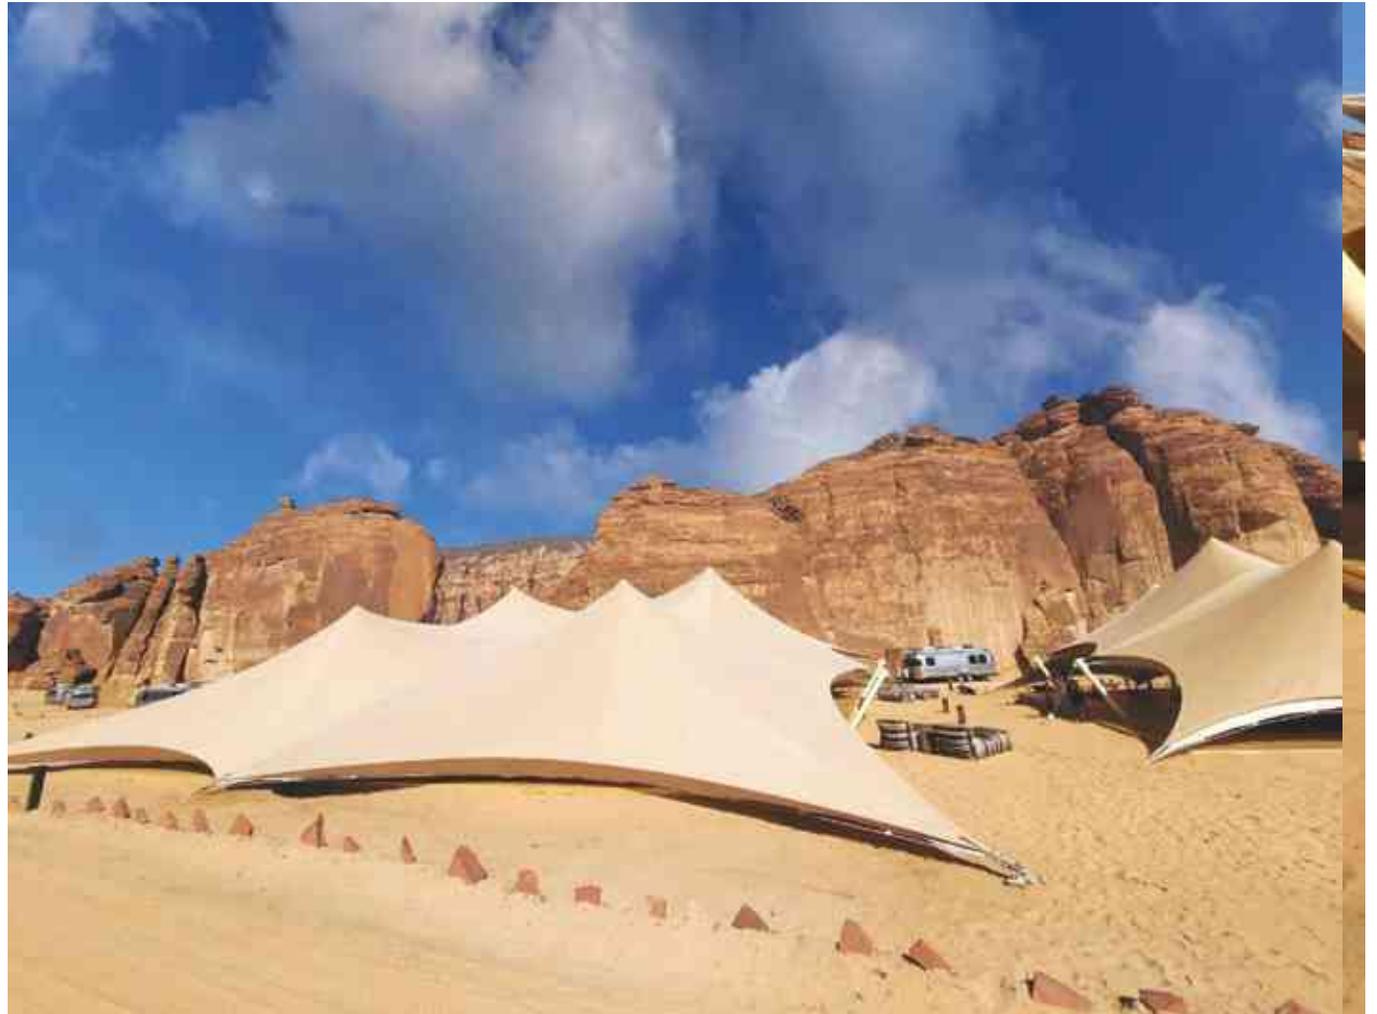

Urban Entrances & Gates & Safari Camping Tents

MOFA – Several Entrances

Date of installation: 2008-2016

Fabric Type : PVC- PVDF

Over the years al ajllan tensile structures have become preferred construct techniques. It is not surprising considering the advantages of these structures. These structures are very popular in the west and now this technique has come to SAUDI. There are only few tensile structure manufacturers in market who really provide excellent services. So selecting a good service provider is crucial.

Urban Entrances & Gates & Safari Camping Tents

Security Check Point
Fabric Type : PVC- PVDF

Urban Entrances & Gates & Safari Camping Tents

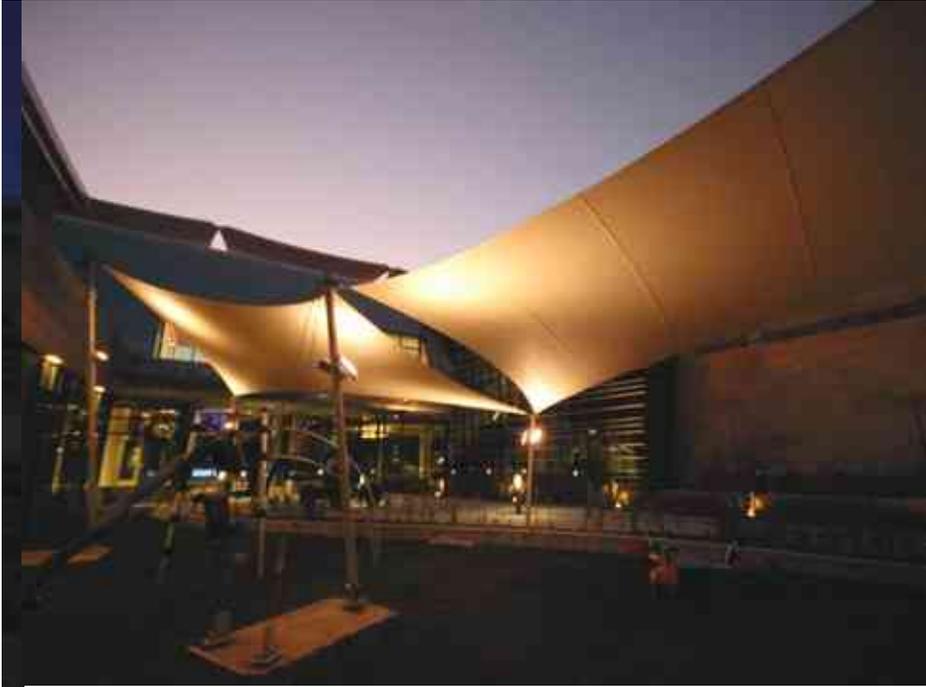

KAPSARC Project - Aramco

All community Area and play grounds

Date of installation: 2012 - 2013 - 2014

Fabric Type : HDPE - PVC- PVDF - PTFE

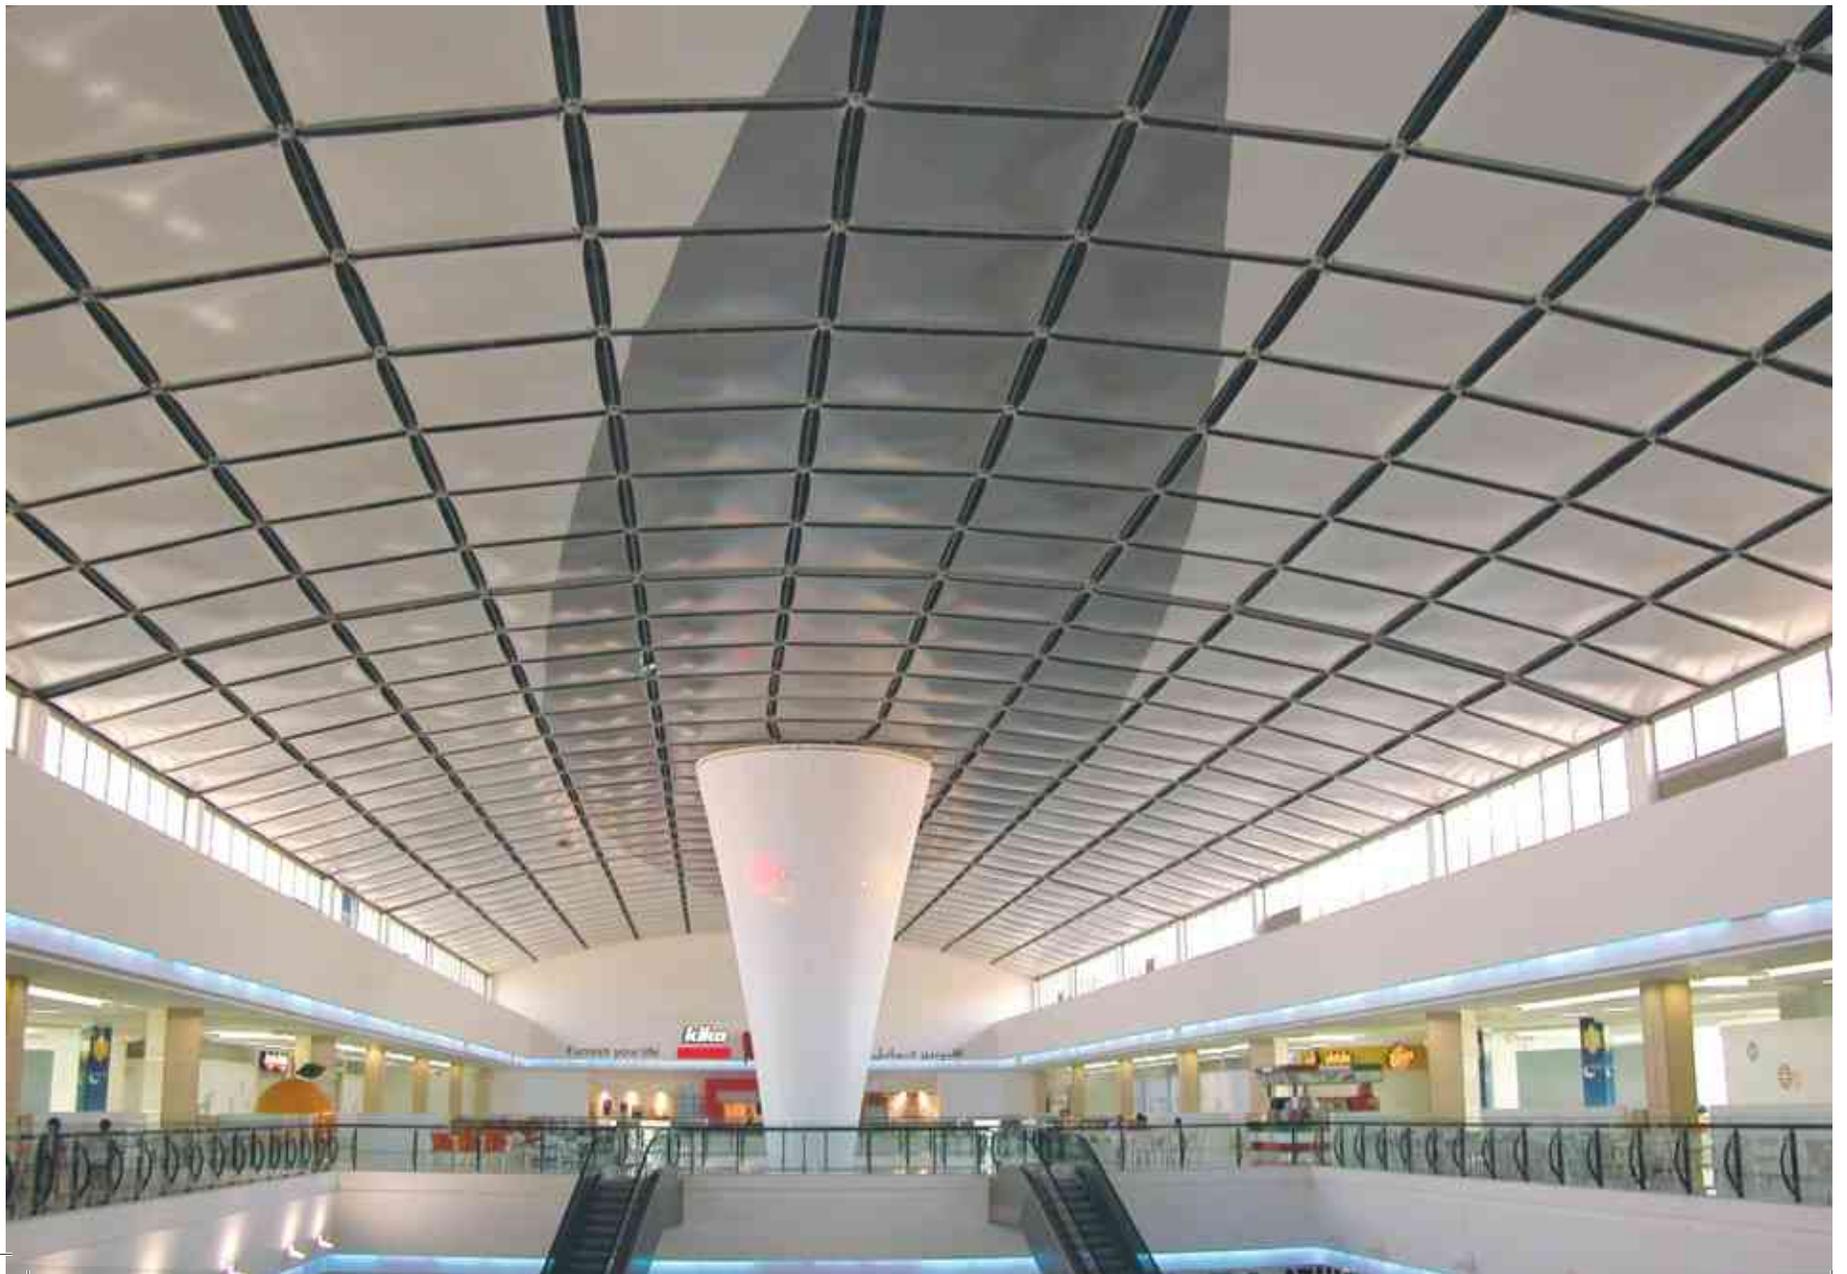

Urban Entrances & Gates & Safari Camping Tents

Resorts & Public Gardens

Today fabrics are long lasting and rival traditional building materials for their strength and durability. One of the advantages of fabric is the strength to weight ratio that allows for lightweight construction and savings on materials.

Resorts & Public Gardens

Private farms and spa – where elegance is important

As people get outside to enjoy a host of spring activities such as backyard barbecues and festivals, the weather can affect the number of guests that attend the special events. Protect guests and outdoor activities with tension fabric structures. Fabric structures from Al Ajllan can protect people from the bright sun and the rain to keep people shaded and dry underneath.
