

CAD/CAM/CAE SOLUTIONS

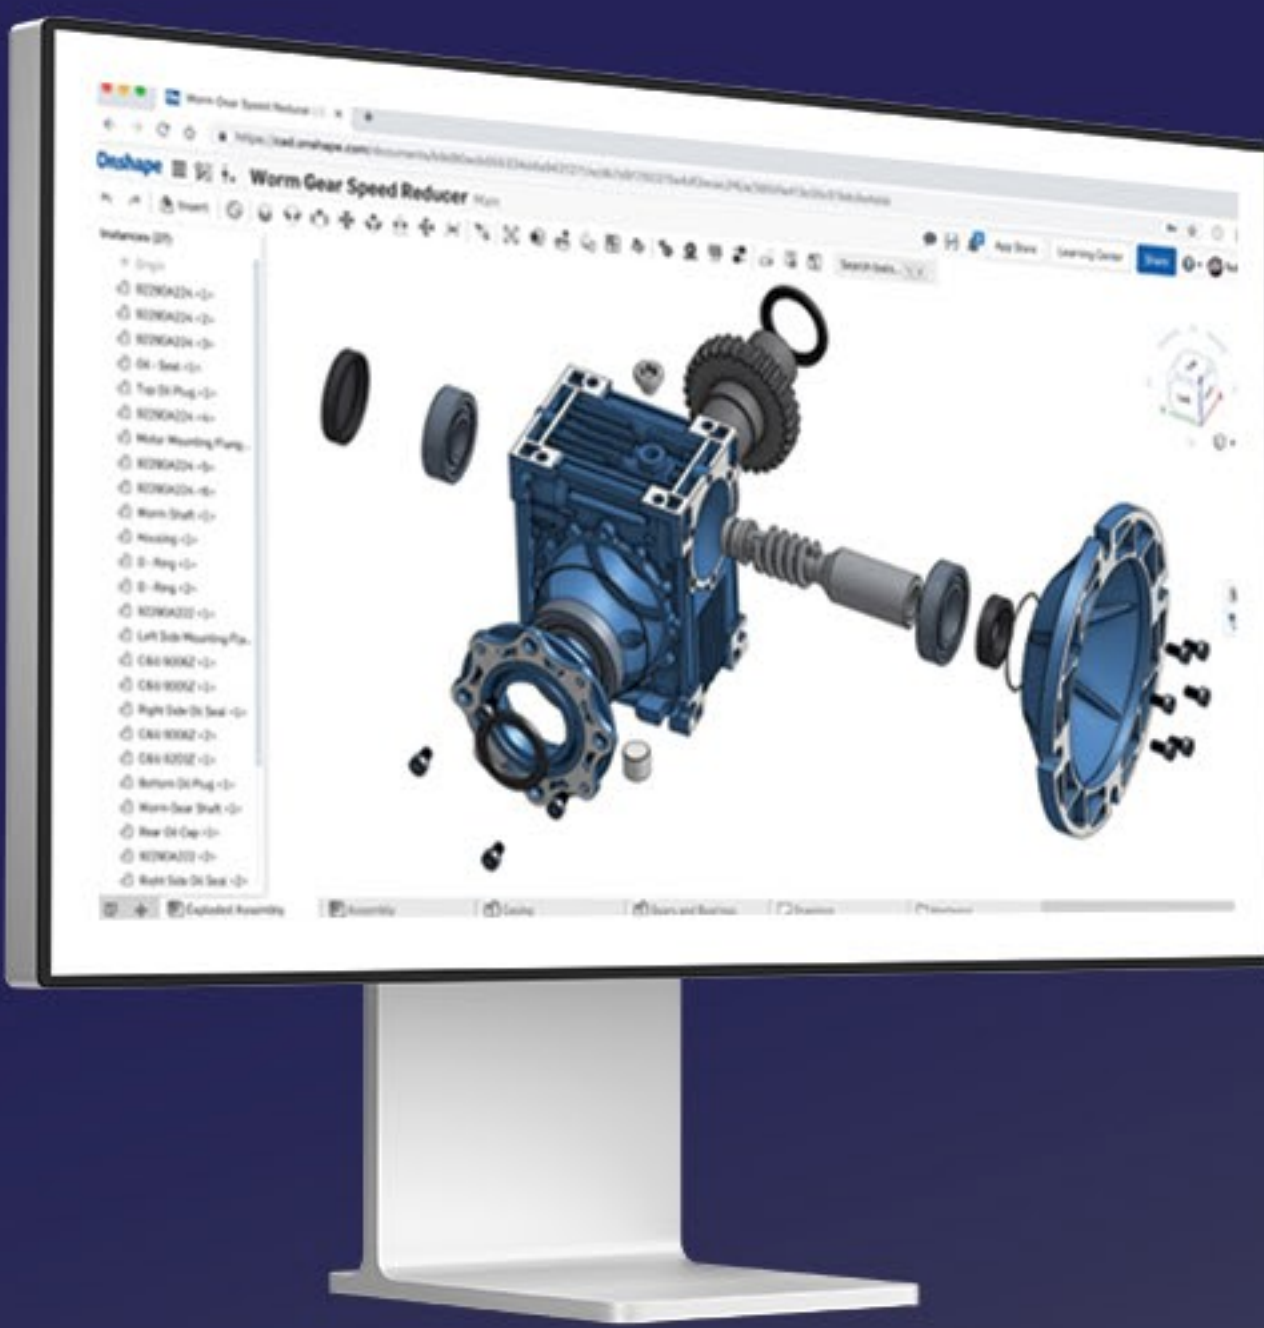

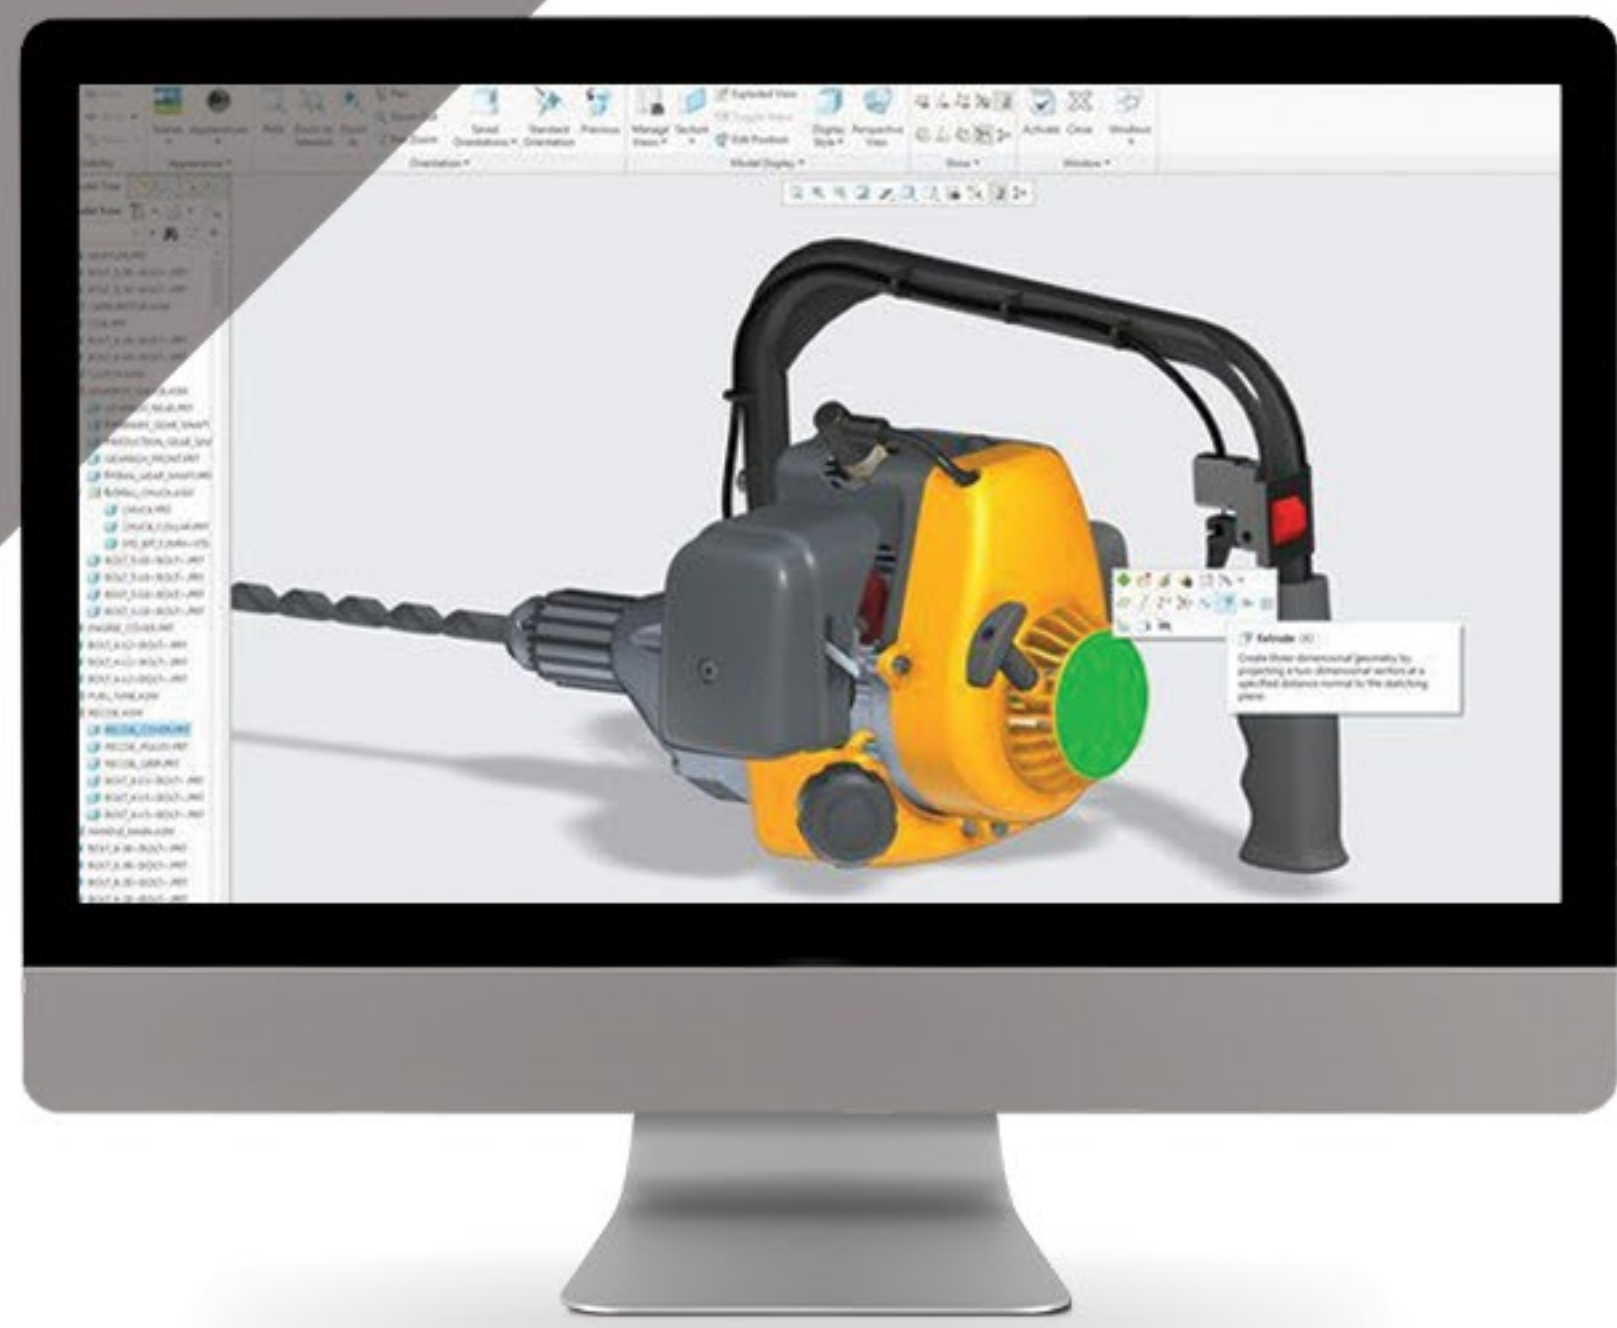

Go Digital to Improve the Physical World

“Design the way it should be

Imagine, design, create, and innovate your products better with Creo, 3D CAD/CAM/CAE software, and solutions for product design and development.”

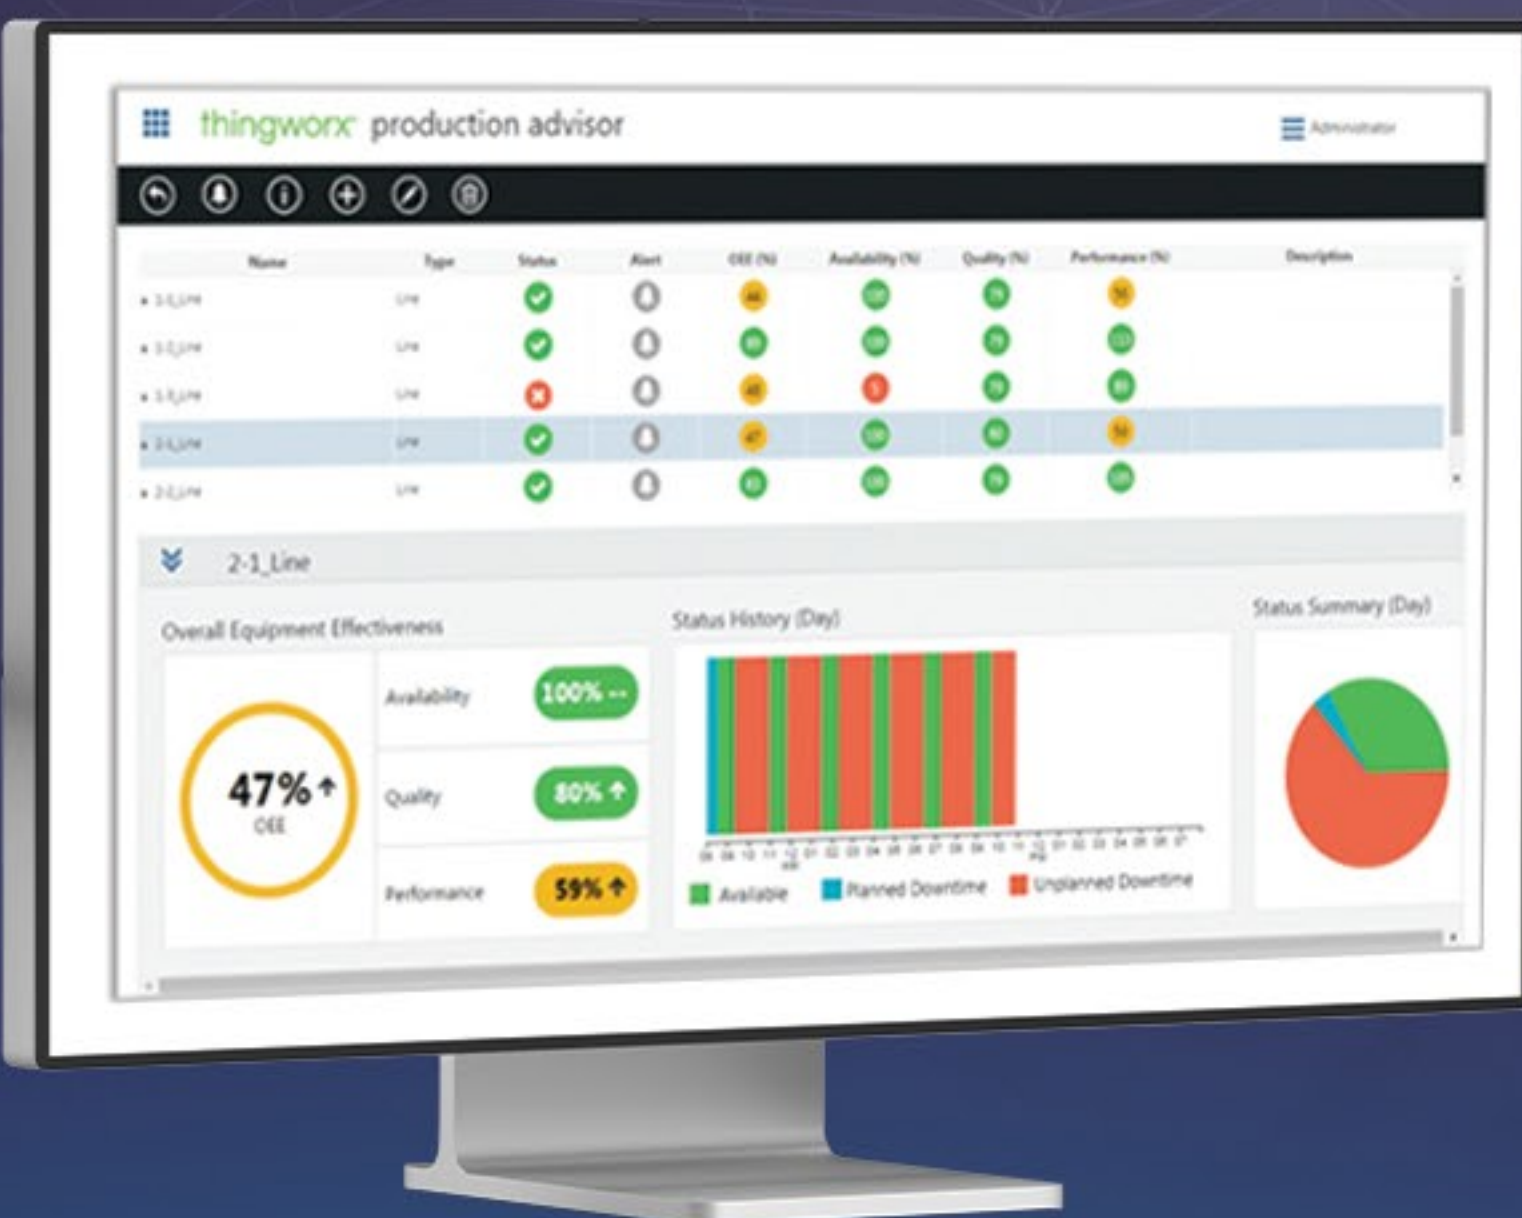

“Create, Innovate, Collaborate in the Cloud

The leading design platform built for the cloud, combining CAD and PDM with advanced collaboration and analytics capabilities, empowering you to innovate at the speed of today’s business.”

“Market-Leading Enterprise AR

Vuforia is a comprehensive, scalable enterprise AR platform. Our wide-ranging solution suite ensures that we can provide the right AR technology to every customer based on their business needs.”

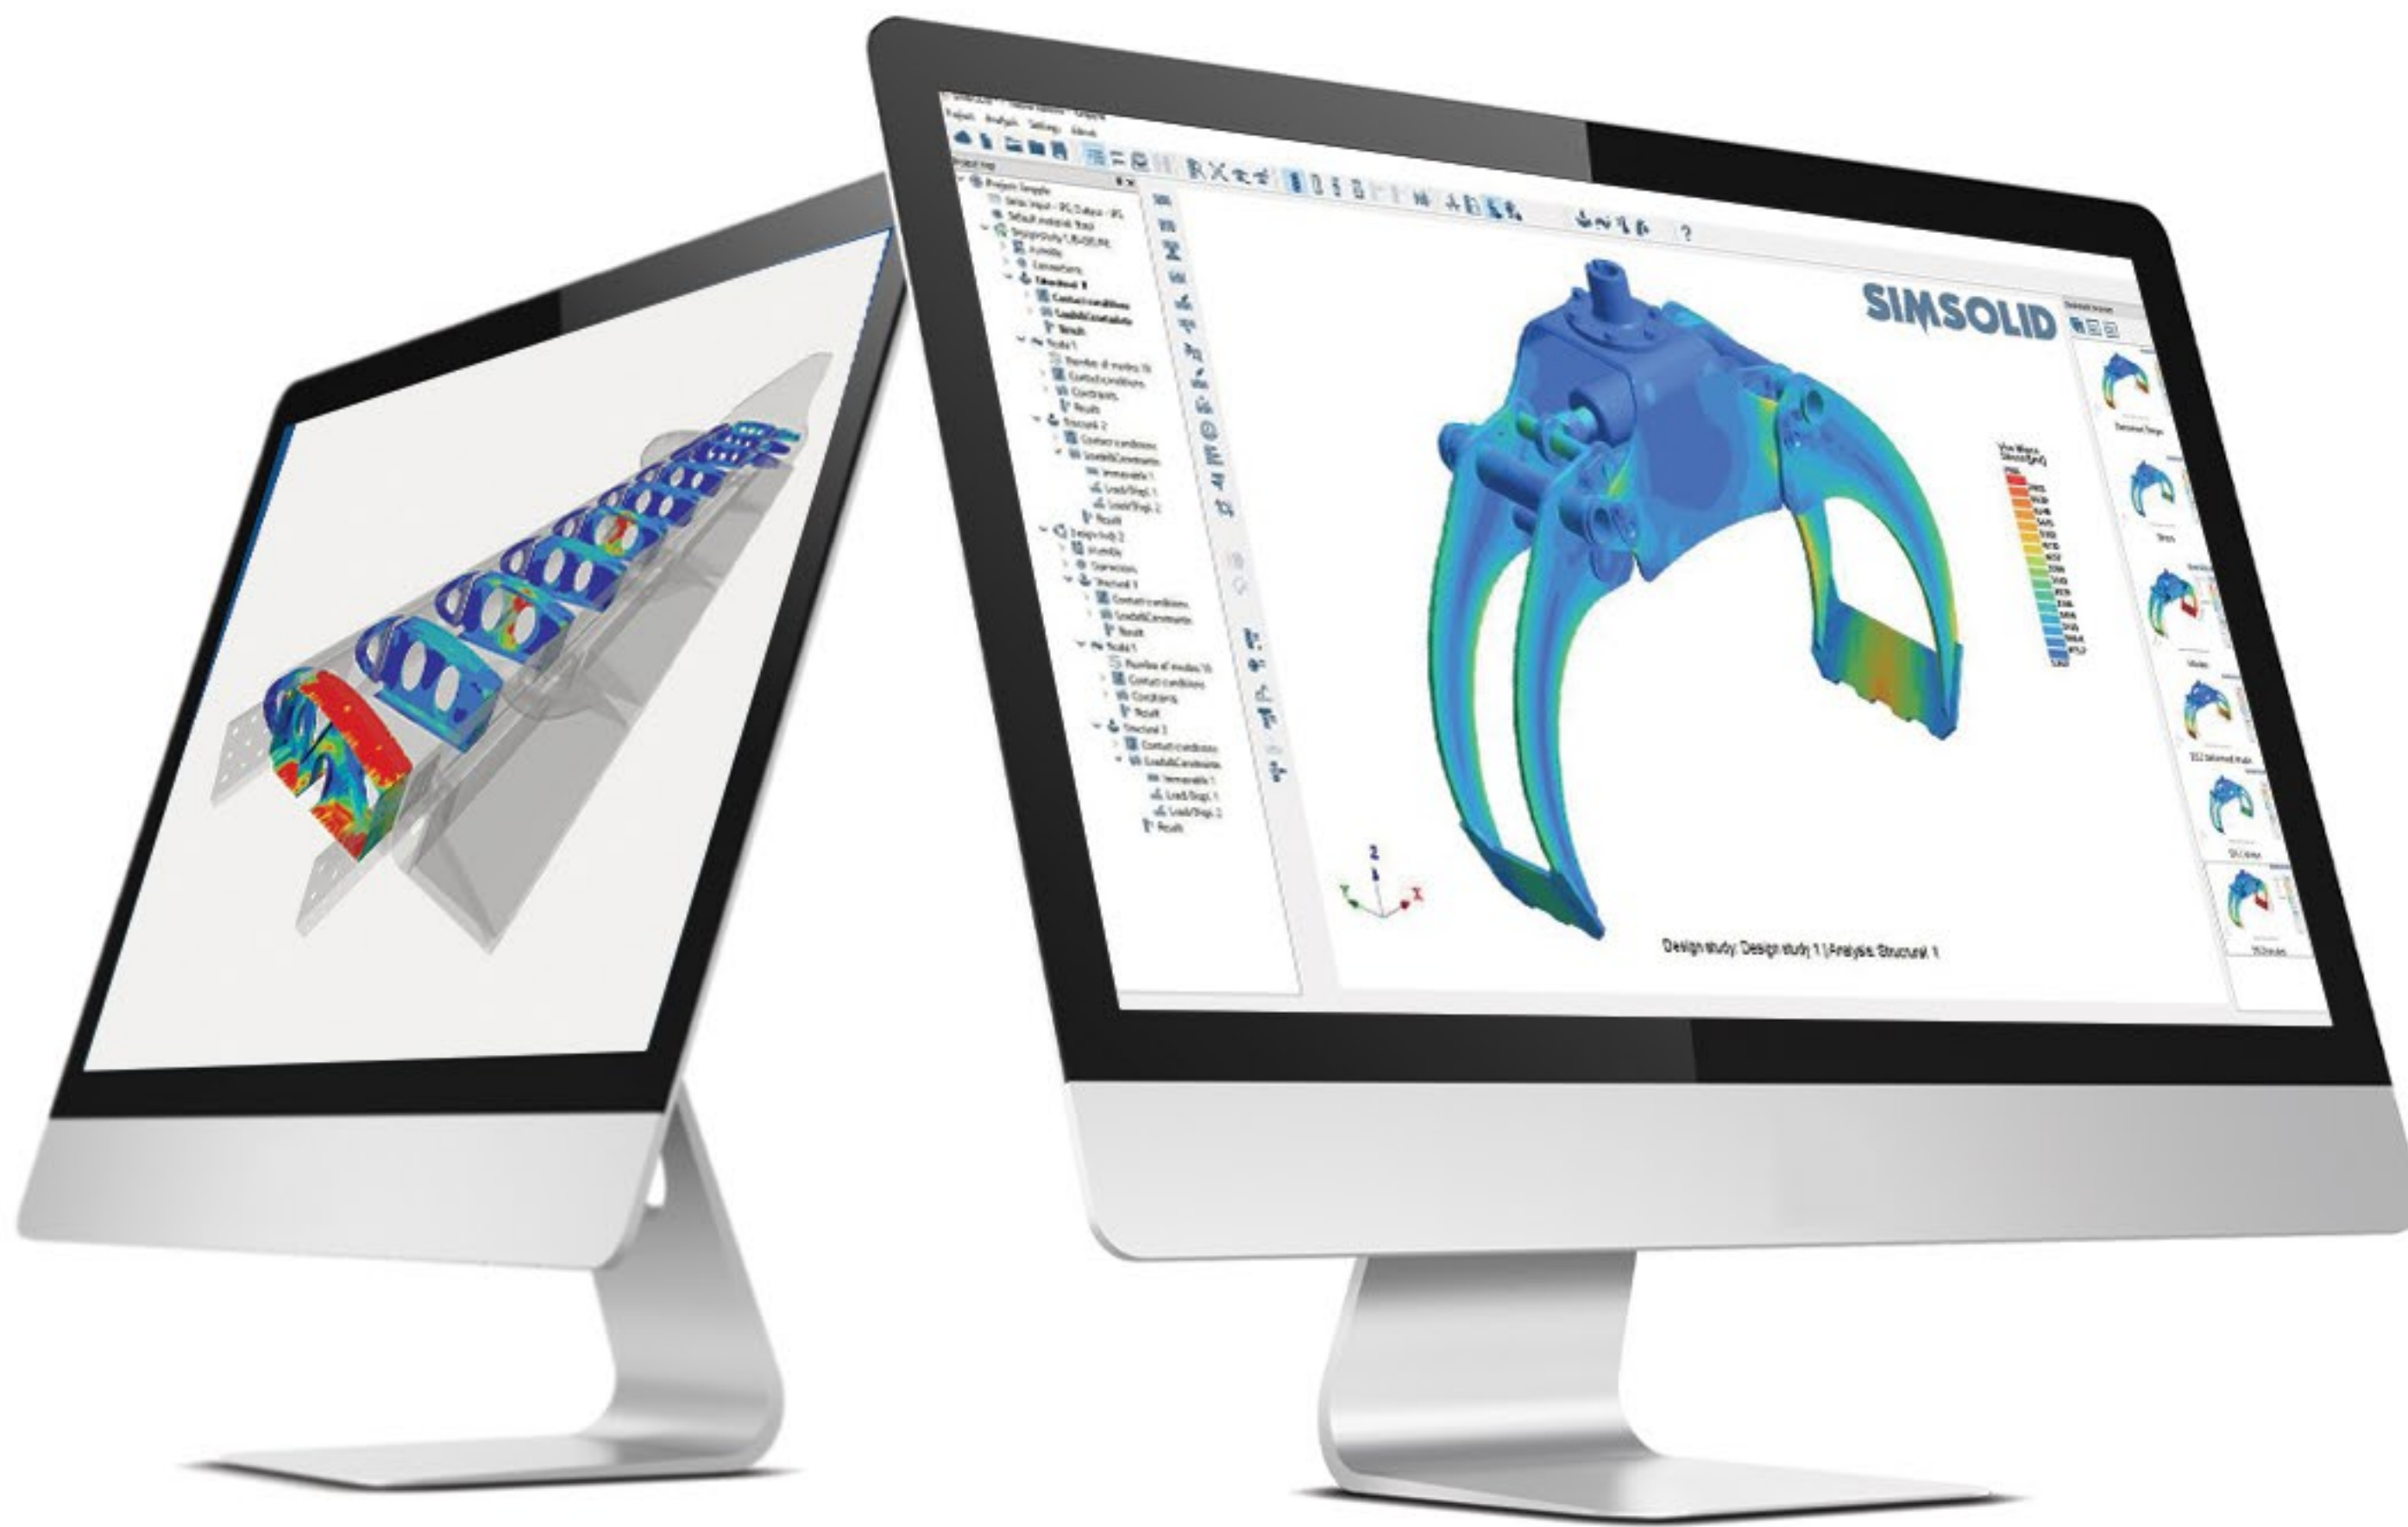

“Accelerate Success With ThingWorx IIoT

Remove your barriers to digital transformation with ThingWorx, the IIoT platform purpose-built to address your business challenges.”

Changing Tomorrow, Together

Altair offers a unique set of simulation tools to evaluate product feasibility, optimize the manufacturing process, and run virtual try-outs for many traditional, subtractive, and additive manufacturing processes.

“**Accelerate Innovation**
with unlimited access to software
and high-performance computing resources”

Altair® SimSolid®

Structural Analysis for Rapid Design Iterations

The Game-Changing Simulation Technology for Designers, Engineers, and Analysts.

Altair AcuSolve™

General Purpose Fluids and Thermal Simulation

A proven asset for companies looking to explore designs by applying a full range of flow, heat transfer, turbulence, and non-Newtonian material analysis capabilities

Altair® HyperMesh®

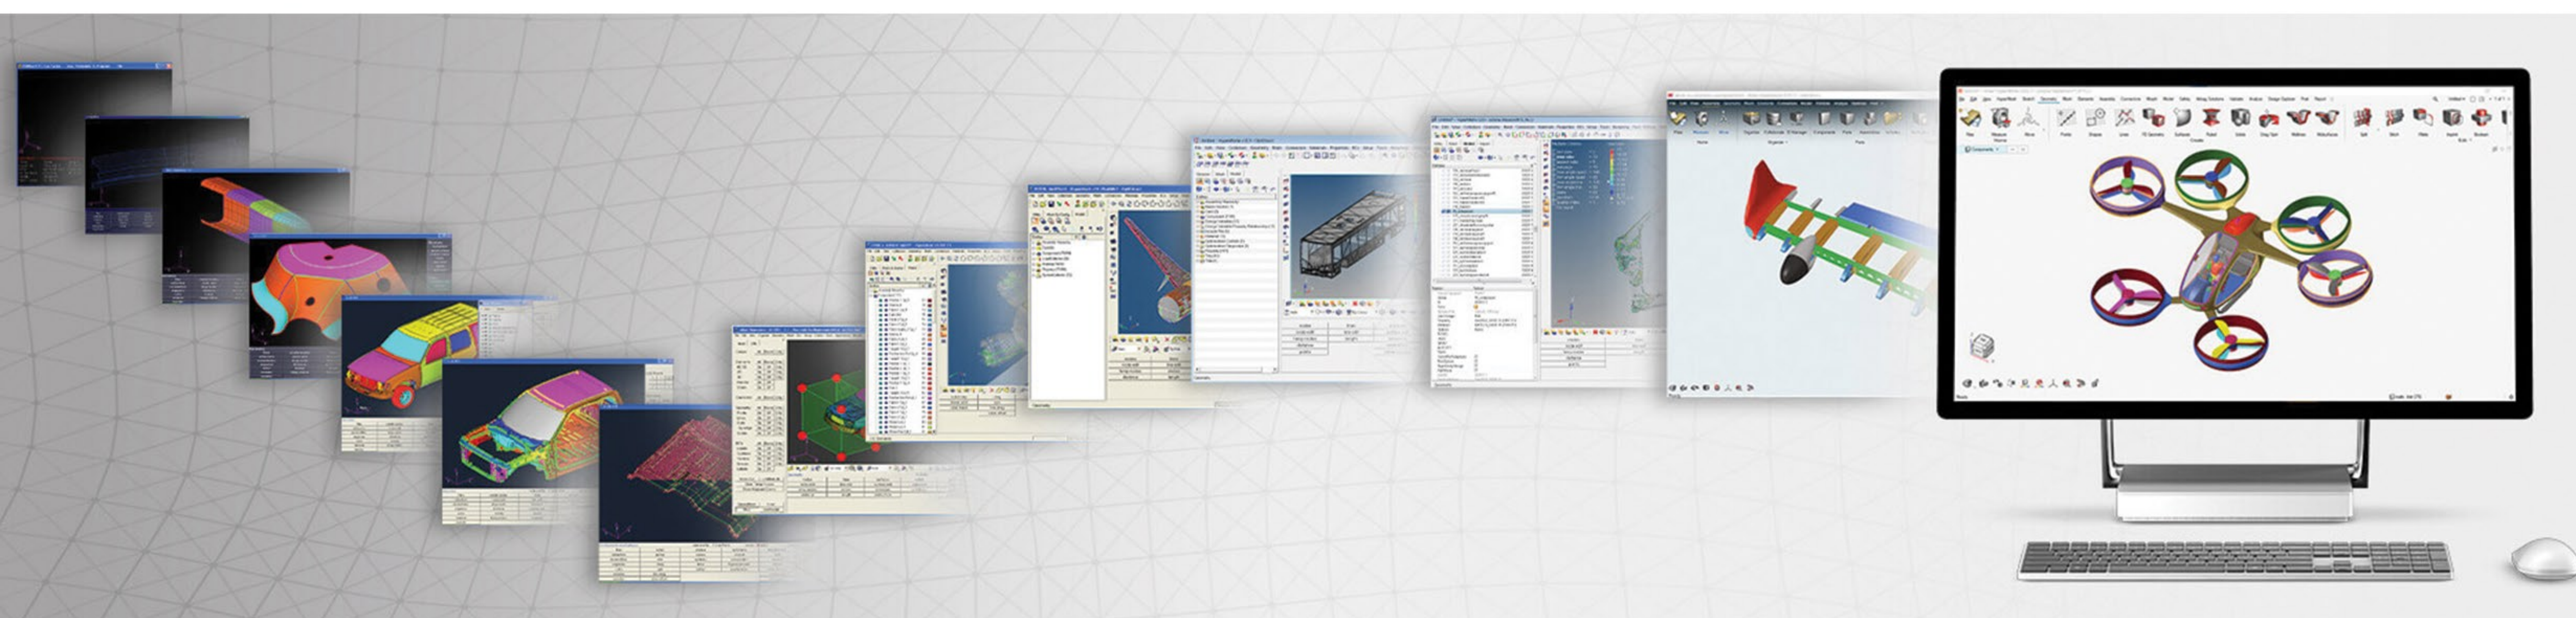

Accelerate Your Product Development

A History of Solving the Most Challenging Problems

Altair® HyperWorks®

Driving More Design with Simulation

Create, explore and optimize designs within HyperWorks to produce robust designs.

HEXAGON
MANUFACTURING INTELLIGENCE

Computer-Aided Manufacturing (CAM Software)

WORKNC

Leading high-end CAM software solution for complex models in the mould, die and tooling industries for 2 to 5-axis CNC programming.

ESPRIT

A powerful CAM system for CNC programming, optimization, and simulation.

VISI

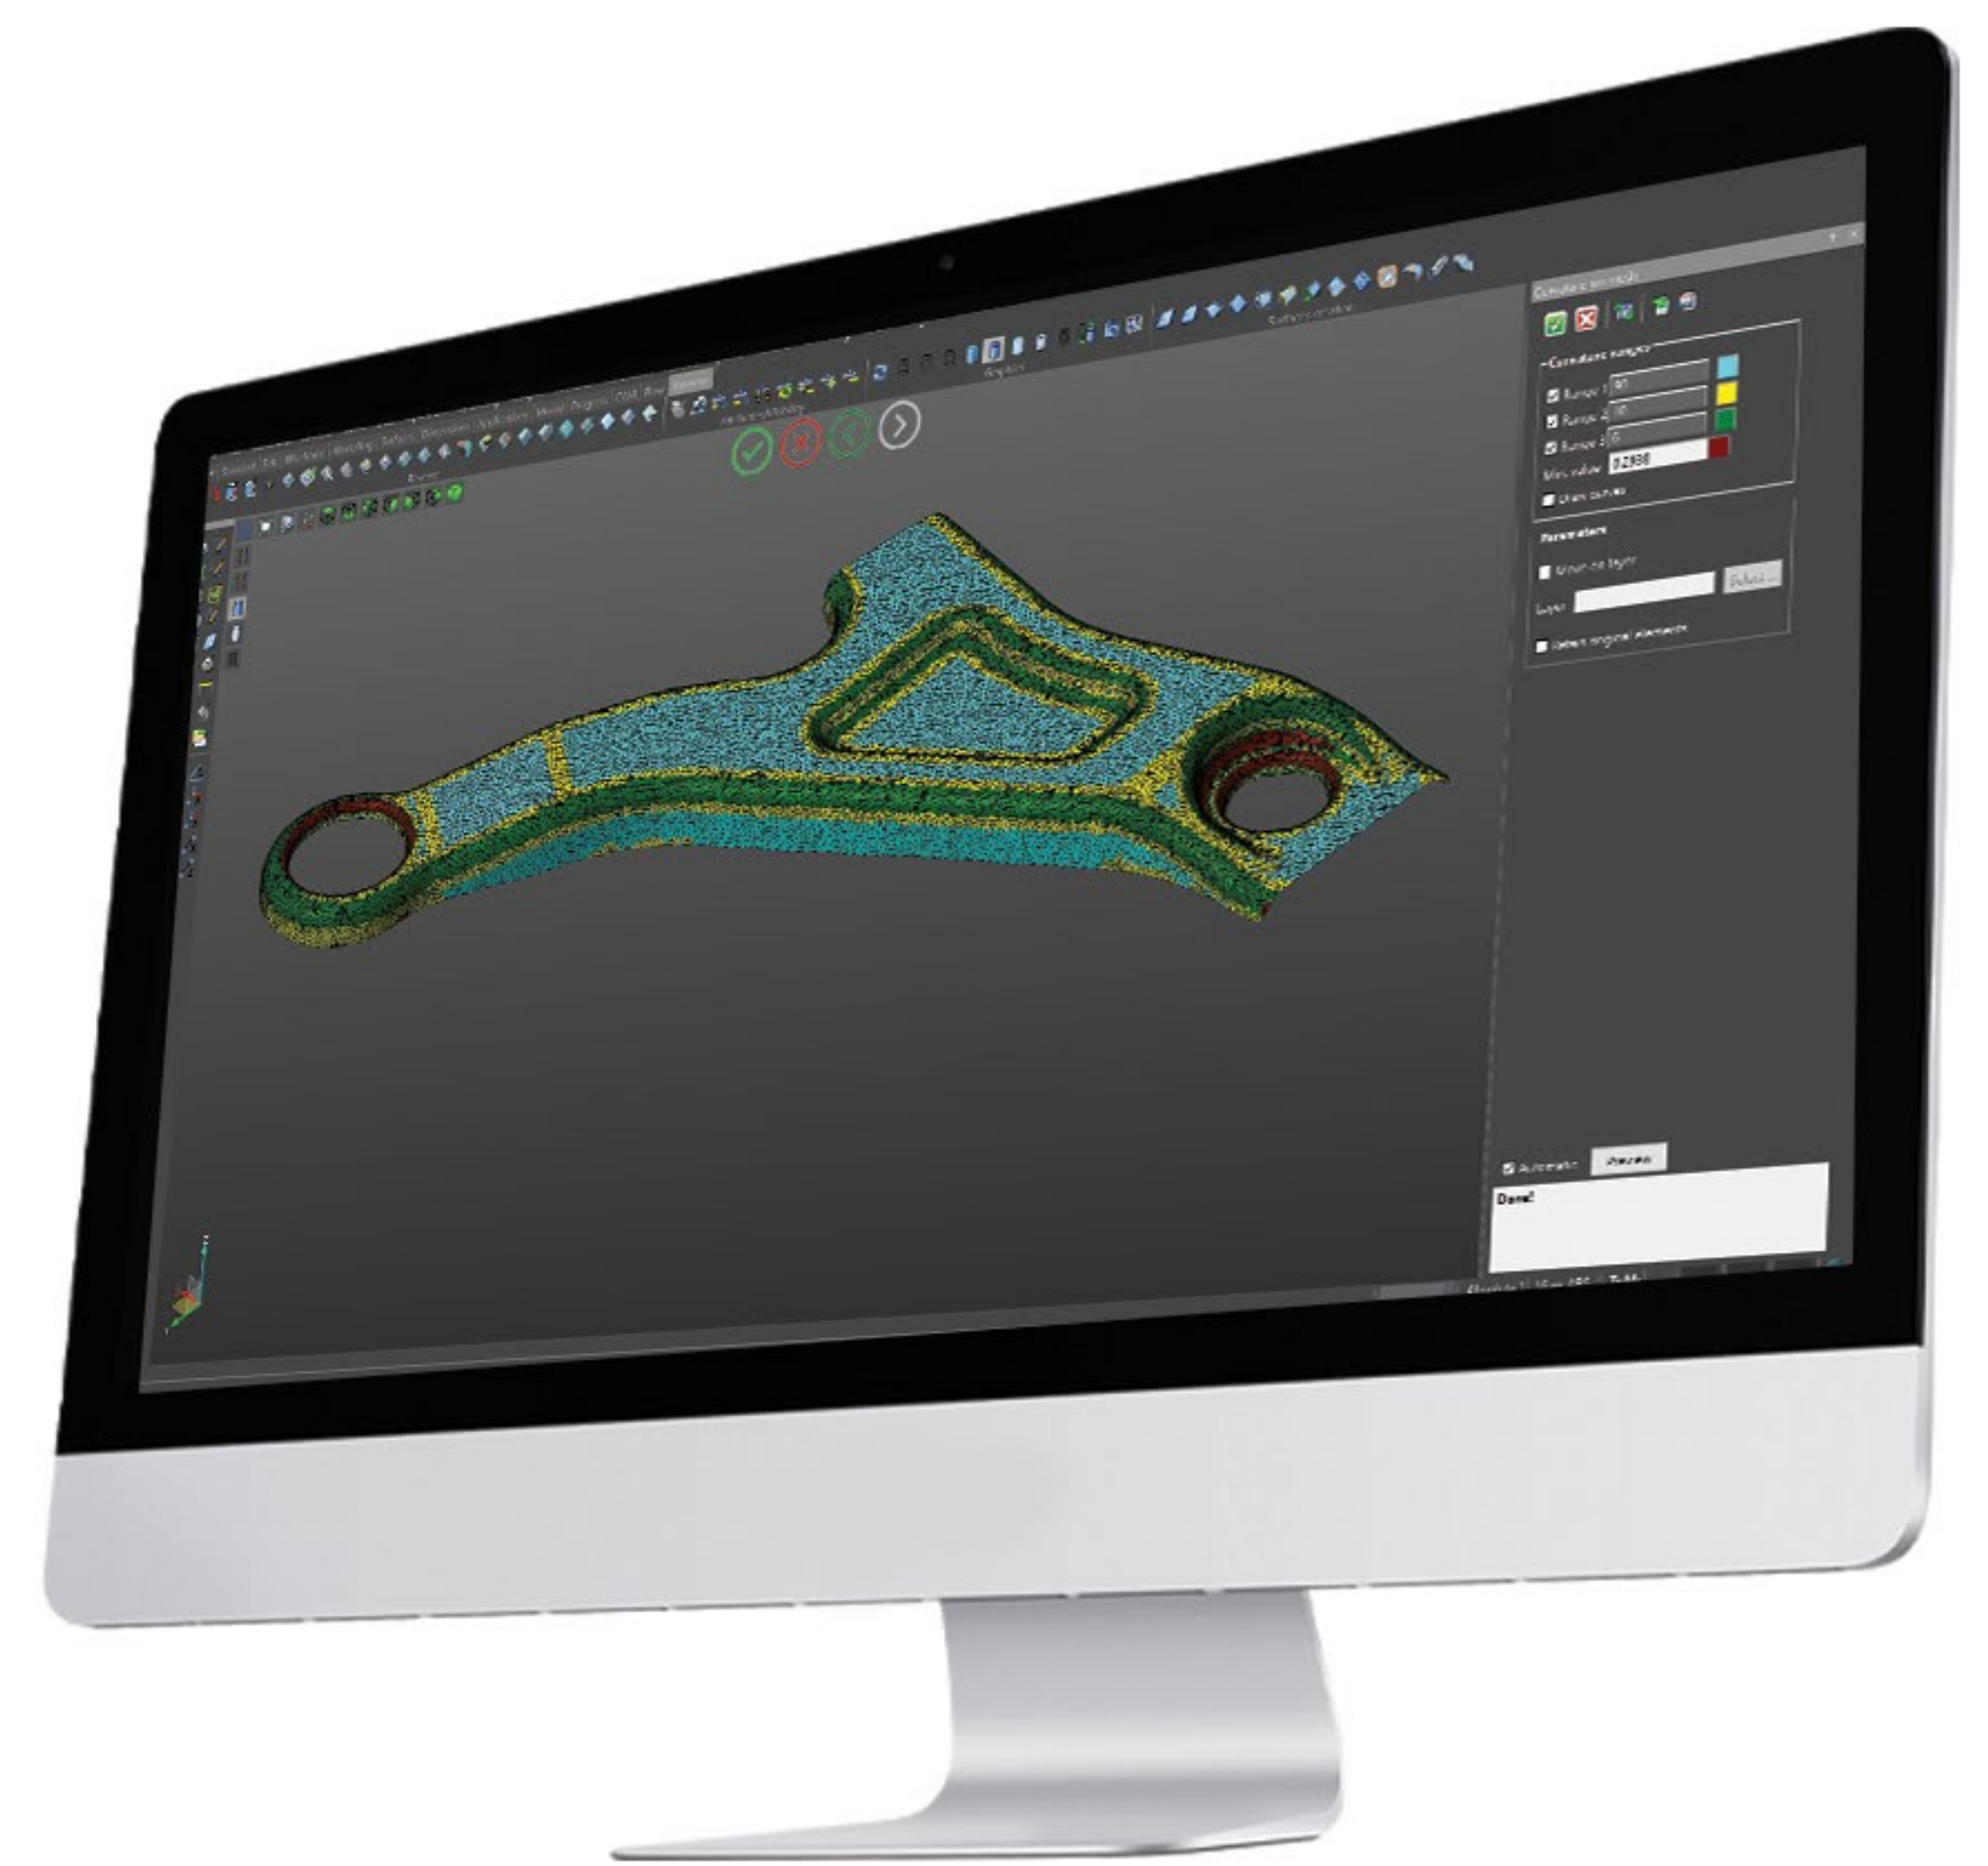

A CAD/CAM solution for the mould and die industries

NCSIMUL

All-in-one CNC simulation software that manages the complete machining process from the NC program to the machined part.

EDGECAM

A market leading production CAM solution, combining the power of sophisticated toolpath generation with seamless CAD integration.

“ Make it Smarter

Hexagon's Manufacturing Intelligence provides solutions that use data from design and engineering, production and metrology to make manufacturing smarter ”

ImageGrafix Engineering Solutions DMCC
