

**thrislington cubicles**

**thrislington cubicles** just perfect engineering

**We love showing off our systems, so for this reason, all Thrislington product imagery is now real photography.**

**We don't use CGI.**

**As modern as we are at Thrislington, we will always be a little bit old-school. We also want you to be able to really understand the craft and artistry behind everything we produce.**

**It's not quite magic, just perfect engineering.**

# our unique selling points

To view a film of our USPs in action, scan here or visit [www.thrislingtoncubicles.com/usp](http://www.thrislingtoncubicles.com/usp)

## self closing doors

From our top of the range hydraulic closing system to a spring loaded mechanism, all of our doors are designed to self-close as standard, leaving your washroom looking as neat as you intended. Alternatively, the mechanisms can be factory set to fall open.

## full aluminium framework

The strength behind all our cubicles is the floor supported full aluminium framework, whether visible or hidden. It has been said that people choose Thrislington because of how the cubicles look, but they come back to order again because of how they work.

## minimal fixings

Our products are as minimalist as possible, with clean lines and uncluttered panels. Even when visible fixings are essential, we employ neat, yet very tough, architectural components.

## market leading guarantee

We offer a no fuss manufacturing guarantee, up to 15 years. All of our products are built to stand the test of time, which we believe to be critical to our environmental strategy.

## our installation team

Unlike our competitors, we don't just sell the product at the back door, we supply and install worldwide, to ensure that our installations look as good as they were designed.

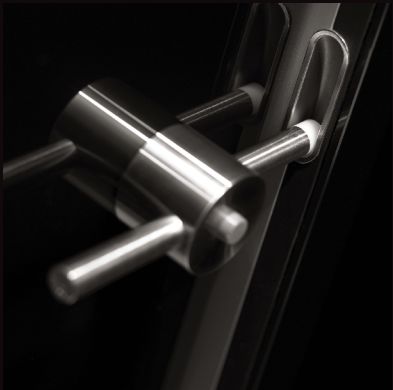

## integrated locking

Unlike a normal latch and bolt system, our locks are designed to integrate directly into the aluminium frame of our cubicles and are through-fixed for added strength.

## pivoted doors

Our doors open by pivoting from a headrail to either a post bracket, foot or floor bracket. This means all our cubicles are free of hinges, the weak point of any door. Our discreet pivots are only visible inside the cubicle, even on an outward opening door. The only visible difference on an outward opening door is the pull handle.

## range of finishes

Our products are available in a market leading range of different finishes including glass, wood veneer, stainless steel, aluminium, acrylic, compact grade and high pressure laminate, all in a limitless range of options.

## bespoke design

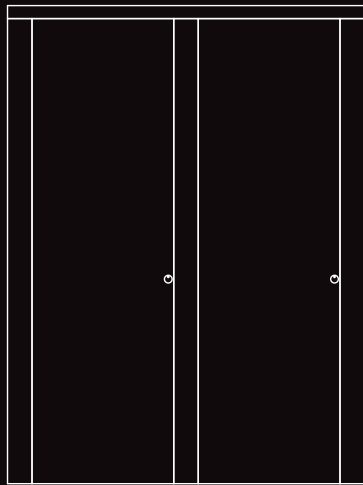

We like to think we know everything there is to know about washroom design, but that doesn't mean that we are not open to new ideas. With our unique bespoke design service, we are able to work with you, to create your ideal specification.

# the full package

At **Thrislington**, we have long prided ourselves on designing and manufacturing the world’s best toilet cubicles, urinal screens, IPS, vanity units and lockers.

Now, as part of the global **Bobrick** group, we are also able to offer a range of stunning stainless steel accessories.

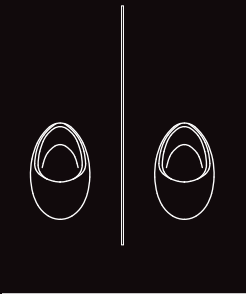

In the washroom world, we are now, truly, the full package.

## cubicle systems

We’ve been building the world’s best toilet cubicles at our factory in the United Kingdom since the 1960s.

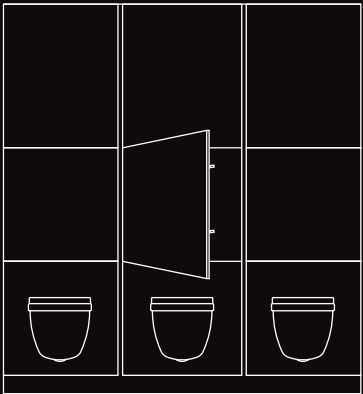

See page: 12

## urinal screens

We offer a range of urinal screens, all designed to match perfectly with our cubicle and panel systems.

See page: 34

## integrated panel systems

**Sentry** has hardly changed over the last 30 years, because it continues to perform as originally intended.

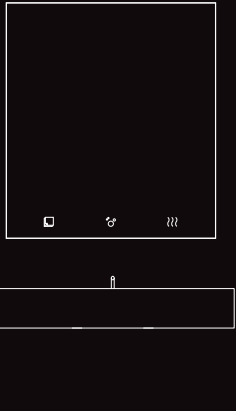

See page: 40

## washroom accessories

**Bobrick** has created a stunning line of washroom accessories, with **Koala Kare** offering the world’s best baby changing units.

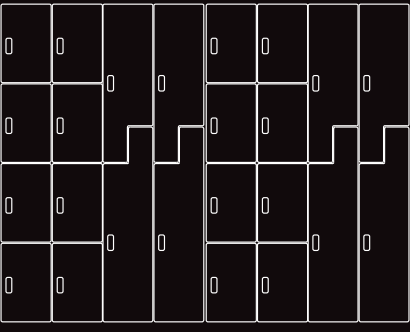

See page: 48

## vanity units & mirror systems

A range of market leading vanity units and mirror systems suitable for any high-end washroom.

See page: 56

## lockers and benches

Our hard-wearing locker system is designed for both wet and dry areas and is available in a variety of layouts.

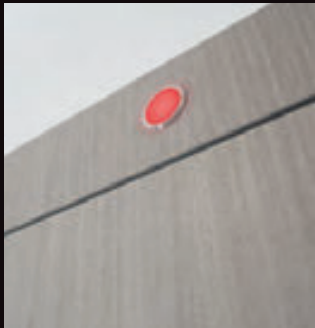

See page: 62

# product options

## e-access

In an emergency situation, our unique E-Access system with its 180 degree closer, allows an inward opening door to also open out, therefore allowing access into the cubicle.

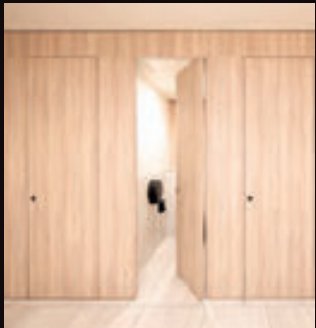

## led indicators

Our integrated LED system, normally situated at high level, provides a user with a quick indication of occupancy, which is particularly useful in high-traffic areas. This also helps in reduce queuing times and encourages social distancing.

## smart

We design products to last, with an eye on the future, such as our Smart washroom development. Smart will help users and will provide building owners with useful information, offering potential cost savings.

## extended height

We can extend the maximum of our full height cubicle ranges up to 3500mm high by introducing over panels (transom). To omit the visible joint between the headrail and the over panel, an alternative Extended Headrail detail is available on our **Flow** cubicle, which allows an increase up to 3000mm.

## structural walls

Where a project chooses a structural wall between cubicles, we can provide doors and fascias to either sit between the structural walls or clad the front of them.

## arc

Arc is the stunning solution to maximise space in a circular building or curved environment. Arc is unique in the washroom world and can be applied to any of our cubicle systems.

## hardware

Our locks, feet and other stainless steel hardware can be PVD finished to give a variety of metallic finishes. As an alternative, all our hardware can be powder coated to any RAL/ Pantone reference.

## frames

The cubicle framework can be powder coated to any RAL/ Pantone reference or colour anodised. The frames can either complement the colour of the door material or be a striking contrast.

**We take great pride in how our products work. Neither over nor under engineered. We also don't just sell our products at the back door. We provide a full installation service using our own employed installers. This is not a way of adding extra cost, but is to ensure that our clients get the product benefits they have paid for. Historically, we have installed all of our products worldwide. As our international business has rapidly grown, we have established a group of Distributors, authorised to install our products to our precise standards, as we train, certify and audit.**

We've been building the world's best toilet cubicles at our factory in the United Kingdom since the 1960s.

We offer a range of cubicles from our new **Touchless** cubicle, flush top of the range full height **Flow** cubicle, floating **Ribbon** system and aluminium framed **Oasis** cubicles.

Flow Superloo HPL cubicles with LED indicators, Sentry HPL IPS and integrated Countertop solid surface vanity unit with Reveal mirror box

Flow Superloo HPL cubicle, Sentry HPL IPS with wall mounted sink

Flow Superloo HPL cubicle, Sentry HPL IPS and integrated Countertop solid surface vanity unit with Reveal mirror box

Our **Superloo** is a cubicle system that is perfect for gender neutral applications, restricted space, or increased privacy. In fact, it's more of a room than a cubicle.

Each **Superloo** allows for complete integration of the washroom accessories inside the cubicle, concealing pipework and cables, therefore making the area hygienic and simple to clean.

A **Superloo** is also an ideal, modern, hygienic solution, as the room created is completely private, with its own individual wash basin. The user has no close contact time with other users, whilst hand washing.

- Available in:**
- Glass
  - Stainless Steel
  - Aluminium
  - Veneer
  - Compact
  - High Pressure Laminate

flow touchless the ultimate hygienic washroom available in 2024

To download technical details or view a film of **Touchless** in action, scan here or visit [www.thrislingtoncubicles.com/touchless](http://www.thrislingtoncubicles.com/touchless)

Flow Touchless HPL sensor with indicator

Flow Touchless HPL cubicle with **Sentry** aluminium IPS

Specify now for installation in 2024.

Create the ultimate hygienic washroom with our new **Touchless** cubicle system.

The discrete sensor also acts as an indicator, removing the need for a conventional lock. Once an approach is made, the doors will elegantly open, then close and lock behind the user.

It's not quite magic, just perfect engineering.

A fully integrated access system that offers door control from the exterior and interior of the cubicle using hand proximity sensors. Externally, the sensors are located on the fascia between cubicle doors. The headrail houses the stainless steel pivot block, motor and discreet electromagnetic locking system, providing users with security during use. The system runs using 24 volt electrical power via a transformer from the mains power supply.

Available in:

- Glass
- Stainless Steel
- Aluminium
- Veneer
- High Pressure Laminate

# flow technical detail

**Features/Benefits:**

Floor to ceiling design provides full privacy and increased acoustic performance, ideal for gender-neutral applications.

Concealed full aluminium framework, provides inherent strength.

Up to 2700mm high with 8mm standard floor gap.

Height can be further increased using either an extended headrail or an over panel, ensuring cubicle can run to the full height of any washroom.

Floor gap can increase to 35mm or if fascia is down to the floor, gap under door and divider can be as required, to allow design options.

Substantial 42mm flush finished doors.

Rebated doors ensure flush finish and zero sight lines.

Pivoted system means no hinges, the weak point of any door.

Pivoted door means no external visible fixings, even on outward opening doors.

Self-closing hydraulic door closers ensure doors close softly and beautifully, eliminating slamming.

Precision engineered stainless steel lock with flush face plate, hand turned in the UK.

Lock designed to allow opening using a closed fist, ensuring inclusive design for users with reduced manual dexterity.

Lock locates into integral receiver, which eliminates the weak point of a face fixed lock keep.

303 grade stainless steel hardware.

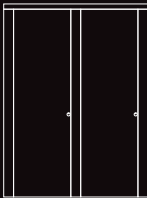

Wide range of finishes available from various leading manufacturers, provides the ultimate in choice.

Core sourced from legal and sustainable sources.

Emergency release.

15 year warranty.

Please see rear of brochure for link to current environmental credentials.

We offer a range of urinal screens, all designed to match perfectly with our cubicle and panel systems.

Gamma urinal screen as seen in Hudson Yards, New York. Scan QR code to view all urinal screen case studies

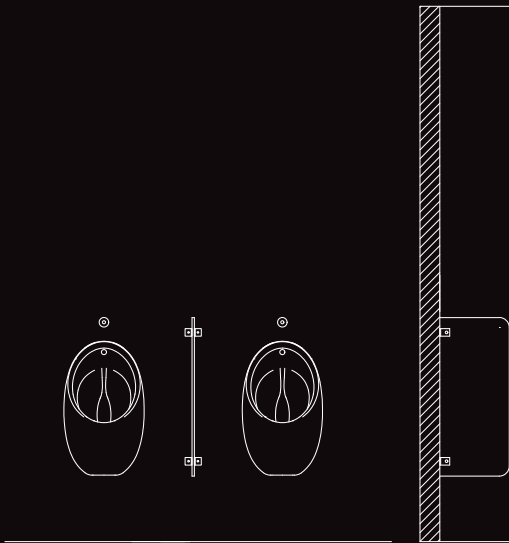

**urinal screens**

# urinal screens the ideal range

We have been developing our urinal screens for almost as long as our cubicle offer. We have found that designs of screens can vary significantly from one project to another, so we want to show our more popular designs, to make the choice easier.

Notwithstanding this, we are happy to work alongside you, using our bespoke design service, to create unique solutions for your project.

Our urinal screens have a 5 year warranty and can be made in different sizes and thicknesses. They also come in a variety of finishes such as glass, veneer, acrylic, stainless steel, aluminium, compact grade laminate and high pressure laminate. This means that the urinal screen can complement the cubicles or provide a striking contrast.

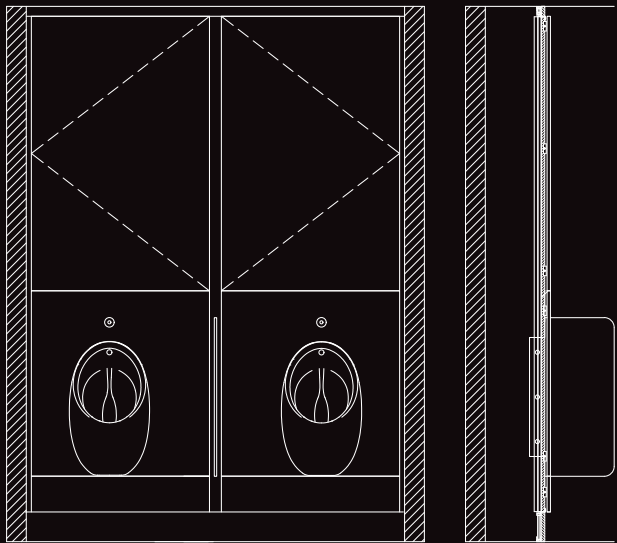

alpha wall hung with brackets

**Alpha** is a simple wall hung screen fitted to the back wall using aluminium brackets.

As there is no support to the front of the screen, the depth of the screen is limited to 350mm. It is essential that L brackets are used, rather than a U bracket, so that the screen can be tightly captured to reduce movement. As standard, the brackets are SAA finish, but can be powder coated or anodised to complement other metalwork in the washroom.

**Available in:**

- Glass
- Stainless Steel
- Aluminium
- Veneer
- Compact Grade Laminate
- High Pressure Laminate

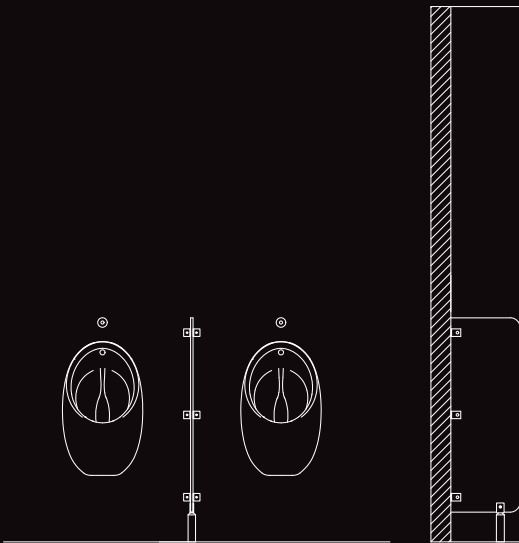

beta wall hung with hidden fixings

The **Beta** screen is a wall hung option that is integrated with either a **Sentry** or **Alloy** panel system. Rather than fixing the screen using visible brackets, we create a slot in the back panel infill and the screen can pass through the slot and be invisibly fixed.

The depth of the screen measured from the front of the infill is limited to 450mm, because there is no support at the front of the screen.

**Available in:**

- Glass
- Aluminium
- Veneer
- Compact Grade Laminate
- High Pressure Laminate

gamma with stainless steel foot

**Gamma** is ideal when a deeper screen is preferred, as a foot is introduced to provide support. If a tall screen is chosen, then an inverted foot can also be fitted to the ceiling.

Fixing **Gamma** to the back wall can be achieved either by using aluminium brackets, finished as standard in SAA, or by using our concealed steel bracket depending on the material finish chosen.

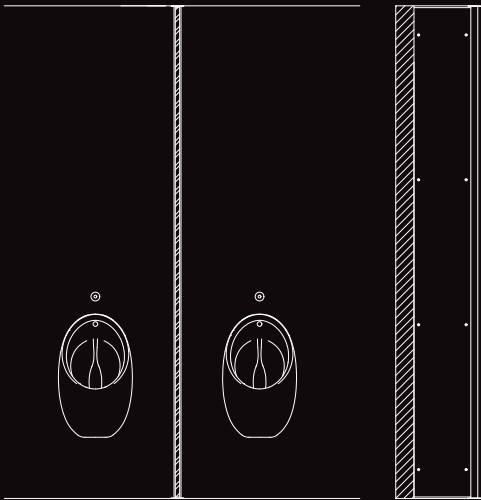

**Available in:**

- Glass
- Stainless Steel
- Aluminium
- Veneer
- Compact Grade Laminate
- High Pressure Laminate

To download technical details, scan here or visit [www.thrislingtoncubicles.com/urinalscreens](http://www.thrislingtoncubicles.com/urinalscreens)

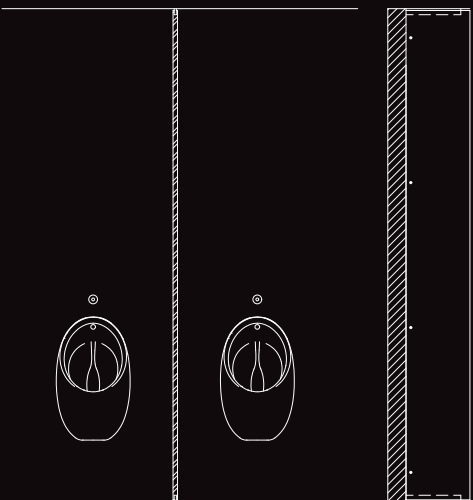

# urinal screens the ideal range

delta with floor to ceiling box section

Where a deeper urinal screen is needed then **Delta** provides an option, being secured by a floor to ceiling full height aluminium box section. The panel can also be full height from the floor to the ceiling, but alternatively can be suspended off the floor and away from the ceiling by the box section. The panel is fitted to the box section and the back wall using discreet fixings.

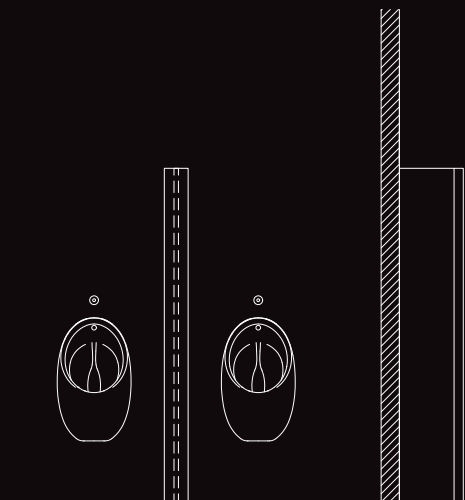

- Available in:**
- Glass
  - Stainless Steel
  - Aluminium
  - Veneer
  - Compact Grade Laminate
  - High Pressure Laminate

epsilon panel spans from floor to ceiling

**Epsilon** provides a sleek, minimalist look with limited visible fixings, using a full height, floor to ceiling panel. The two horizontal edges of the panel are grooved to allow a strip of 12mm compact grade laminate soleplate to be fixed to the floor and ceiling, onto which the panel is slid. The screen is fitted at the back wall using concealed steel brackets (visible on glass and CGL) so that the only visible fixings are the heads of the through fixings.

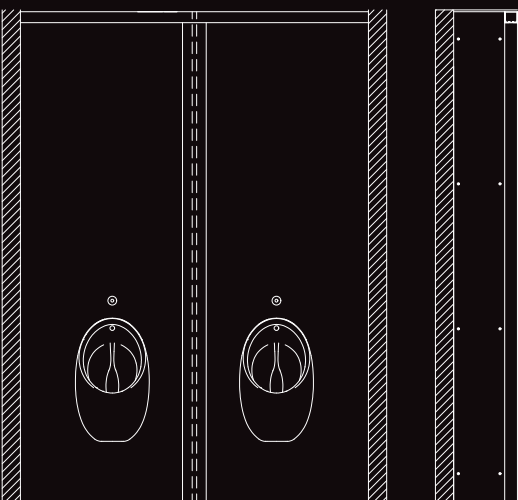

- Available in:**
- Glass
  - Stainless Steel
  - Aluminium
  - Veneer
  - High Pressure Laminate

theta with fascia

**Theta** is intended to complement our flush fronted cubicles. It consists of a panel with a 12mm groove routed into the underside, allowing the panel to be slid over a strip of 12mm compact grade laminate soleplate, fixed to the floor. The panel is then fixed to the back wall and the front fascia by concealed fixings.

- Available in:**
- Glass
  - Aluminium
  - Veneer
  - High Pressure Laminate

kappa with headrail

**Kappa** is our top of the range system, which is effectively a **Flow** cubicle but without a door. Indeed, although it has been more popular to have a shallower divider, it is possible to supply **Kappa** to the same depth as the cubicle. The divider is fitted to the back wall and the rear of the fascia using concealed fixings. The fascia is fitted to the floor with a concealed aluminium channel, to provide stability.

- Available in:**
- Glass
  - Stainless Steel
  - Aluminium
  - Veneer
  - Compact Grade Laminate
  - High Pressure Laminate

Integrated panel systems conceal pipework, whilst allowing access for servicing and maintenance. Our IPS panels can create a seamless washroom solution designed to perfectly match our cubicle systems.

IPS case studies

sentry the versatile panel system that hinges

To download technical details or view a film of **Sentry** in action, scan here or visit [www.thisrlingtoncubicles.com/sentry](http://www.thisrlingtoncubicles.com/sentry)

Sentry glass IPS with WC pan highlighting hinged opening

Sentry CGL IPS housing urinal

Sentry is a versatile panel system that hinges. The system allows easy access for maintenance, as the panel does not need removing, reducing potential damage and avoiding misalignment when re-positioning.

It is a system that's elegant, with intelligent access, but also tough enough to withstand abuse.

Sentry is factory prefabricated and can be used throughout the washroom, behind toilet pans, urinals, wash basins or simply as wall panelling.

Sentry has hardly changed over the last 30 years, because it continues to perform as originally intended. A system that has truly stood the test of time.

- Available in:**
- Glass
  - Stainless Steel
  - Aluminium
  - Veneer
  - Compact Grade Laminate
  - High Pressure Laminate

# sentry technical detail

**Features/Benefits:**

Factory prefabricated, hinged access panel system, ensures installation is quick and simple, saving time and cost.

Used behind toilet pans, urinals, wash basins or simply as wall panelling.

Full aluminium framework provides inherent strength to the system.

Up to 3000mm high, ensuring the system can run to the full height of any washroom.

Number of horizontal splits and heights can vary.

Low height version is available, with a lid/shelf.

Can also be supplied beneath vanity units to allow full access underneath.

Access is facilitated by opening the concealed catches, with the sentry key provided.

Easy access for maintenance staff, reducing potential damage and misalignment when re- positioning.

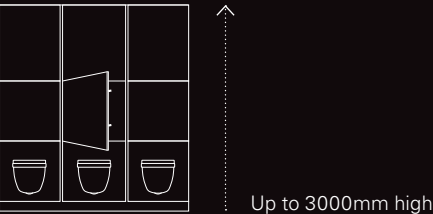

Anti-tamper, anti-ligature and secure options available, allowing the system to be specified in the toughest of locations.

Wide range of finishes available from various leading manufacturers, provides the ultimate in choice.

Core sourced from legal and sustainable sources.

10 year warranty.

Please see rear of brochure for link to current environmental credentials.

Sentry HPL access via supplied Sentry key

Sentry HPL module shown closed

Sentry HPL module shown open

Sentry HPL low height IPS underneath Countertop solid surface vanity unit, Reveal mirror box and B-36903 TrimLine towel dispenser

## alloy aluminium framed hung panel system

Alloy HPL low height panels with Ribbon HPL cubicles

Alloy HPL WC panels

**Alloy** is the alternative to our **Sentry** IPS, strong and tough, but without the hinged access.

It's greatest strength, apart from its aluminium framework, is the fact that it can be supplied prefabricated and hence is quick and easy to install on site.

**Alloy** is ideal for any washroom that requires a stunning finish that will stand the test of time.

**Available in:**

- Stainless Steel
- Aluminium
- Veneer
- Compact Grade Laminate
- High Pressure Laminate

At Thrislington, we've been known for our cubicles, urinal screens, IPS, vanity units and lockers for over 50 years and now, we have come together with Bobrick, to offer a stunning range of accessories and Koala Kare baby changing stations.

Supplied in ultra-durable stainless steel, the **Fino** collection is streamlined to enable you to choose products as simply as possible, with no fuss, just everything matching perfectly, both inside and outside the cubicle.

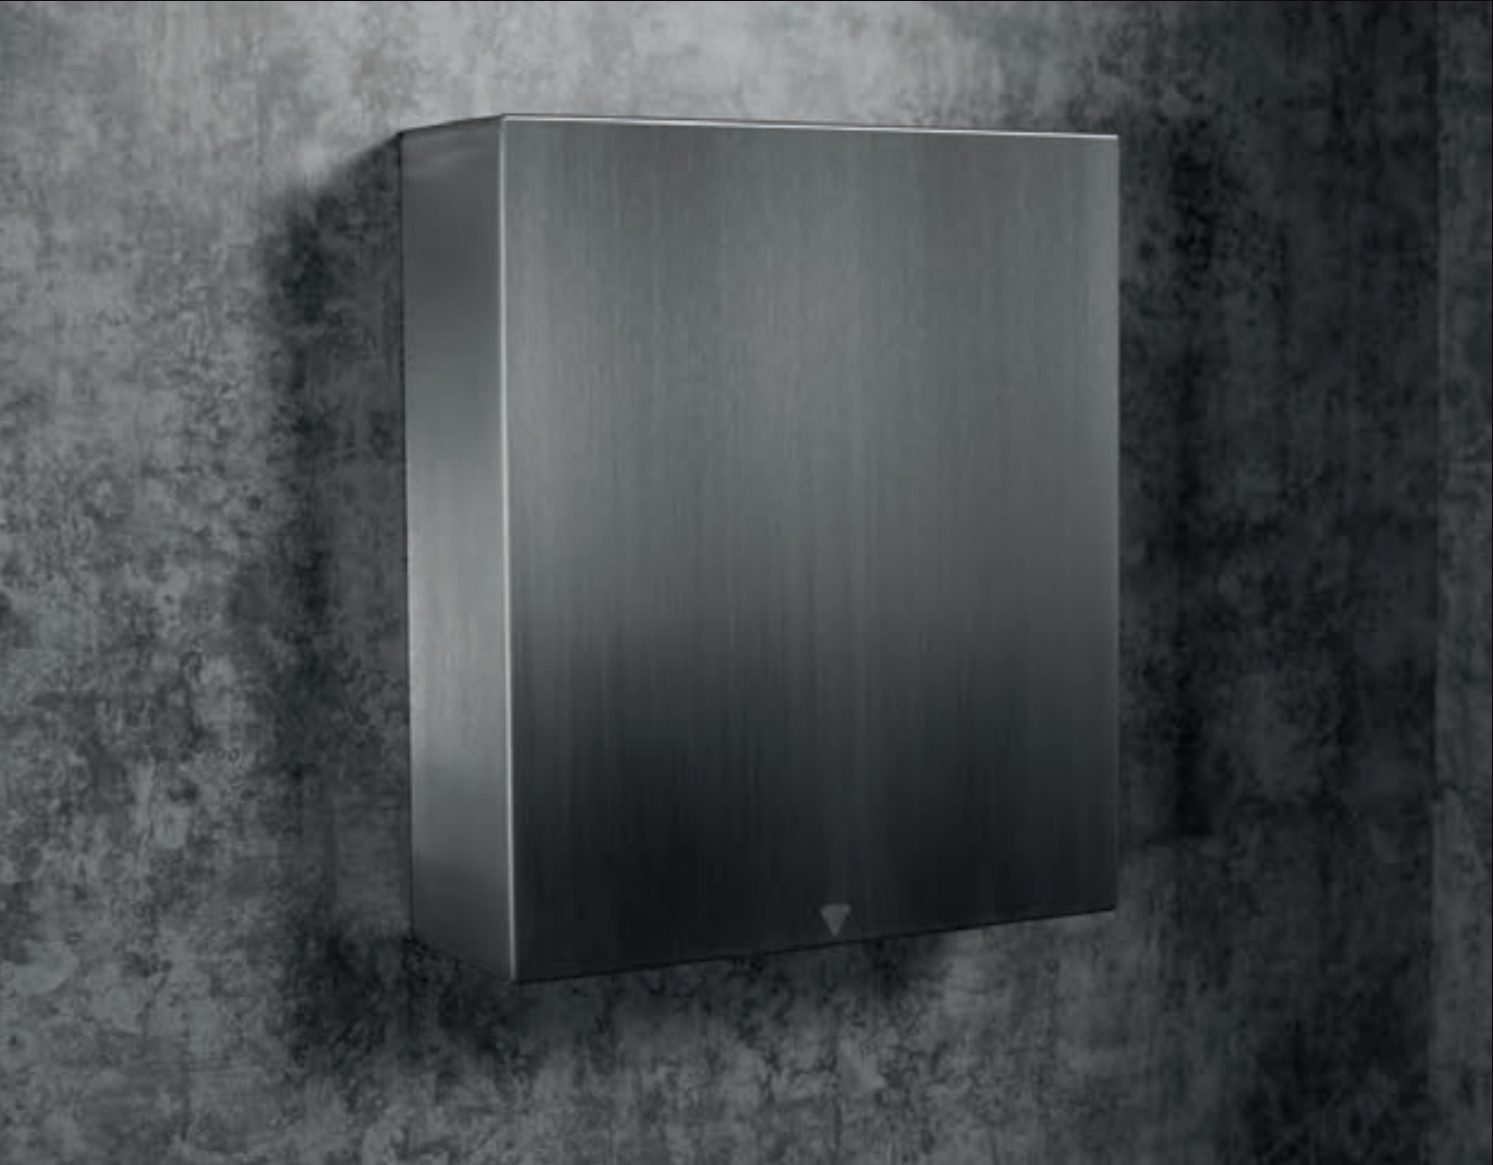

The **TrimLine** range offers a low profile minimalist design. All units are manufactured from 304 grade stainless steel, matching our cubicle hardware.

As seen in Etihad Museum, Dubai.

# accessories

**B-7179** Fino hand dryer

**B-9807** Fino grab bar

**B-9543** Fino single roll

**B-7179** Fino hand dryer in black PVD coating

**B-9807** Fino grab bar in bronze PVD coating

Crafted with high quality satin finish, stainless steel with seamless construction and well defined edges. Our **Fino** Collection offers the perfect balance of function and design sensibility.

The washroom accessory range offers a hand dryer, paper towel dispenser and waste bin, all sharing the same width for a coordinated design. The cubist simplicity adds a new level of sophistication to any washroom.

The cubicle range, which includes toilet roll holders and matching hooks, offers a subtle design for inside the cubicle. The cylindrical aesthetics are the perfect complement to the rest of the **Fino** Collection. For those larger projects, a jumbo roll holder is available.

**Features & Benefits:**

Can be PVD or powder coated in a range of finishes.

Made in UK.

5-year warranty.

B-3725 TrimLine recessed hand dryer with ceramic plate feature

B-36903 TrimLine towel dispenser with TowelMate® and Ribbon HPL cubicles

Our TrimLine Series offers a sleek, minimalist design, all manufactured with satin finish 304 stainless steel. This range features flush locks and 90 degree angles on all exterior and interior corners and openings. Doors have 90 degree returns to conceal flanges for additional design simplicity.

The TrimLine Series comes in satin finish stainless steel as standard as well as a growing number of products in matt black.

As a special order, a selected range of the TrimLine Series can be powder coated to any specified Pantone or RAL colour.

- Features & Benefits:**
- 1-year warranty.
  - 304, 22 gauge (0.8mm) stainless steel.
  - All-welded construction.
  - Majority of waste bins complete with a removable, leakproof, rigid moulded plastic waste-container.

Majority of paper towel dispensers can be equipped with TowelMate®.

DOC-M compliant where necessary.

# koala kare baby changing stations

KB310-SSRE Koala Kare recessed stainless steel unit with Oasis stainless steel cubicle and B-9279 Fino waste receptacle

KB310-SSRE Koala Kare recessed stainless steel unit shown open

Baby changing stations that feature a one-piece, deep-drawn, uniform grain stainless steel exterior. This construction eliminates seams, sharp edges, and weld lines to form a modern aesthetic.

Laser etched logo, and an easy to load and use dual cavity dispenser for sanitary bed liners and nappy disposal bags. The stations come with a wall-mounted, stainless steel bag hook to make accessing the nappy bags easier and safer.

The polypropylene bed surface contains exclusive Microban® antimicrobial product protection, which reduces odour-causing bacteria between cleanings.

- Features & Benefits:**
- 5-year warranty.
  - Available in recessed or wall mounted versions.
  - Will support 200 lbs with minimal deflection.
  - Built in dual cavity liner dispenser.
  - No seams, sharp edges, or weld lines.
  - 304 stainless steel with brushed satin finish.
  - Also available in matt black.
  - External stainless steel bag hook available for installation beside the unit.

# vanity units & mirror systems

A range of different vanity units and mirror systems, ideal for any specification and all designed to match perfectly with the rest of our range.

Vanity Units as seen  
in Theatre Royal,  
London. Scan QR  
code to view all vanity  
unit case studies

# vanity units the perfect washroom finish

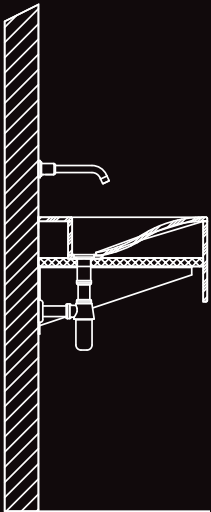

## trough

**Trough** is the height of modern washroom design, as wash troughs are seen as more hygienic than individual sinks. It also helps that ours happen to look fantastic.

Factory prefabricated solid surface material in a variety of profiles including a wave (as drawing), sloping, curved or squared.

Optional **Sentry** access panels to conceal pipe work with mild steel support. When access panels are not preferred, support can be provided by cantilevered stainless steel brackets, as seen above.

**Available in:**  
- Solid Surface

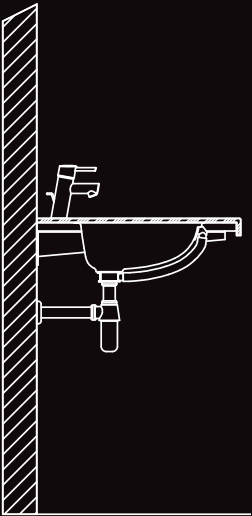

## slab

Our washroom **Slab** unit ticks all the boxes of a modern vanity unit.

Factory prefabricated solid surface or compact grade laminate material, up to 50mm thick. Can be used with ceramic and solid surface basins. Supported on cantilevered stainless steel bracket.

**Available in:**  
- Compact Grade Laminate  
- Solid Surface

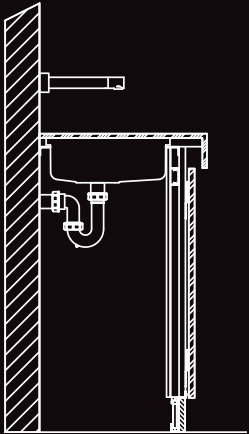

## countertop

Safe, strong and secure, **Countertop** is our traditional vanity unit.

Full depth vanity unit with 100-150mm downstand.

Available in high pressure laminate, compact grade laminate and solid surface. Optional integral upstand at a size to be specified. Can be supplied with **Sentry** access panels to conceal pipe work.

**Available in:**  
- High Pressure Laminate  
- Compact Grade Laminate  
- Solid Surface

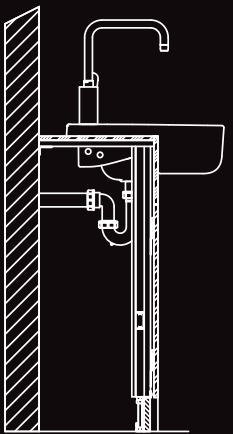

## profile

Ideal for environments with limited space.

Half depth vanity unit with 200-350mm downstand.

Available in high pressure laminate with postformed edge, compact grade laminate and solid surface. Optional integral upstand at a size to be specified. Can be supplied with **Sentry** access panels to conceal pipe work.

**Available in:**  
- High Pressure Laminate  
- Compact Grade Laminate  
- Solid Surface

# mirror systems

BUILDING VALUE SINCE 1906

## led mirrors

The LED Mirror Collection brings high quality LED technology together with commercial grade, scratch resistant mirror construction, to provide a product that reflects quality, value, and style. Manufactured using 6mm safety film backed glass, with rear aluminium frame incorporating key lock holes, for easy wall mounted installation. CE certified with 5 year warranty.

### LED Sizes:

- B-167 1844: 460 x 1120mm
- B-167 2436: 600 x 900mm
- B-167 2448: 600 x 1200mm
- B-167 2632: 650 x 800mm
- B-167 2739: 700 x 1000mm
- B-167 5442: 1350 x 1050mm
- B-167 5625: 1400 x 650mm
- B-167 6642: 1650 x 1050mm

## reveal

**Reveal** is our behind the mirror system which intelligently conceals the washroom accessories. Available in three standard options as noted. Lockable cabinet which opens vertically is supported by gas sprung hinges and is manufactured from laminated MDF, with a solid surface base to allow cutouts and to offer protection from moisture.

Mirrors etched with backlit icons to indicate hidden accessories.

Foam soap dispenser with 500ml or 1 litre capacity and clean tip technology, that pulls residual foam back into the pump after dispensing.

Complete with quiet low-energy, eco hand dryer, and/or a paper towel dispenser including TowelMate®, which helps reduce towel usage by up to 20%.

Also available as standard mirror box without accessories.

### Standard Options:

- 800 x 900mm with soap, dryer and paper towel
- 600 x 900mm with soap and dryer
- 600 x 900mm with soap and paper towel

Bespoke sizes and accessory combinations available upon request.

Reveal with paper towel and soap dispenser

**Fusion** is designed for both wet and dry areas, and has an extensive range of different locking systems. The concealed mechanical closer ensures that doors close slowly and beautifully.

Our matching **Bench** system completes our changing room offer and is designed to be the ideal companion for both our cubicles and lockers.

Fusion as seen in Battersea Power Station, London. Scan QR code to view all locker and bench case studies

**Fusion** CGL lockers with **Bench** CGL, **B-9542** Fino coat hooks and **Flow** compact cubicle

**Fusion** CGL with smart locks and steel body

Our **Fusion** locker system is designed to keep life as simple as possible.

Like our cubicle systems, **Fusion** doors now pivot on integral closers, making them as strong as they are stunning.

The concealed mechanical closer, ensures that doors self close.

Suitable to provide a robust storage solution for use in wet or dry areas and can be situated in a variety of layouts, such as to a structural back wall, as a free-standing unit, back-to-back in an island configuration, or fitted into a recess.

**Fusion** has a huge range of different locking mechanisms and smart technology such as sensors, phone charging and extraction can now all be installed to your requirements.

Supplied fully prefabricated, making them incredibly quick and easy to install.

- Doors available in:**
- Glass
  - Veneer
  - Compact Grade Laminate

# fusion technical detail

**Features/Benefits:**

Factory prefabricated locker modules, ensures installation is quick and simple, saving time and cost.

Designed for wet and dry areas.

Inherent strength to the system provided by the powder coated mild steel carcass. Black as standard, other colours available.

Standard height of 1900mm with 100mm base.

Standard widths of 300 or 400mm with 500mm depth.

Bespoke sizes available on request.

Height can be further increased using either an over panel or sloping lid, ensuring system can run to the full height of any washroom.

Self-closing pivots ensure doors close softly and minimises slamming.

To prevent opening across adjacent lockers and damaging locker keys, doors are restricted to opening 100 degrees.

12mm compact grade laminate or 8mm glass door. Polished to all edges for a stunning finish.

Configurations range from 1-6 tiers, plus 2 tier Z lockers.

Available in a variety of layouts, such as to a structural back wall, as a free-standing unit, back-to-back in an island configuration, or fitted into a recess.

Where the layout results in an exposed end, a panel, polished to all edges, can be supplied.

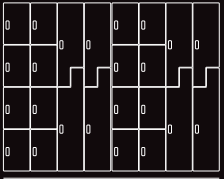

Range of different locking options from hasp & clasp to intelligent digital systems.

Able to adapt to a variety of plinth options.

Wide range of finishes available from various leading manufacturers, provides the ultimate in choice.

3 year guarantee.

Please see rear of brochure for link to current environmental credentials.

Standard version  
up to 1900mm  
with 100mm base.

# finishes

## glass

Glass can be supplied in a range of different thicknesses. Low iron is used to provide a truer colour and is available back painted or laminated. Our glass can be offered in any RAL/Pantone reference and digital print is also available.

All glass is toughened, for the ultimate cubicle finish in either standard, matt or frosted.

## stainless steel

We offer our cubicles in a range of different stainless steel finishes.

Standard 304 grade 240 grit stainless steel is machine folded with seams to vertical edges. Available patterned, coloured and with an anti fingerprint finish.

## aluminium

Aluminium can be supplied in a range of different colours and finishes.

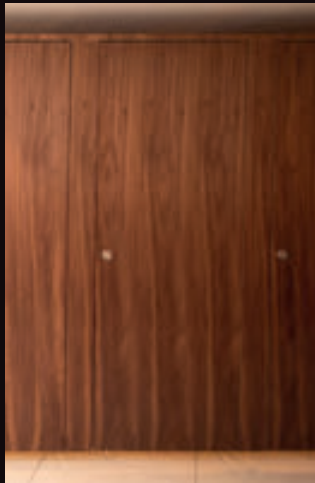

Our satin anodised aluminium cubicles are machine folded with seams to vertical edges. Also available in brushed or stainless steel look. Colours on request.

## acrylic

An environmentally friendly, engineered acrylic polymer, unique to Thrislington, has the look of glass but can be cut on site.

We can offer our acrylic in any RAL/Pantone reference and digital print is also available.

## wood veneer

Wood veneer combines the warmth, depth and natural beauty of a real wood, with the durability, ease of installation and low maintenance of a high pressure laminate. Unlike high pressure laminate decors, real wood veneers have the natural grain and texture of wood.

Can be supplied in a matt, silk or engineered finish in a full range of species.

## compact

Compact grade laminate (also referred to as phenolic) is predominately used in either areas of high traffic or areas requiring greater moisture resistance than high pressure laminate can offer.

A wide range of colours and finishes are available, from various leading manufacturers.

## laminate

High pressure laminate (also referred to as PLAM) is hardwearing, durable and is a very attractive solution for most cubicle and IPS applications, providing excellent resistance to impact, scratches and abrasion.

A wide range of decors and finishes available, from various leading manufacturers such as solid colour, wood grain, soft touch or metallic finishes.

## digital print

In line with our bespoke cubicle offer, we are able to offer digital print on glass, acrylic, compact grade laminate and high pressure laminate.
